## Why Star Cars Have More Power Highest Quality Motors

Star Four Motor develops 30-brake horsepower. Has won every hill climbing contest against all other entrants of any make or price. Won the celebrated 1926 Yosemite Economy Run (sea level to 6,000 ft. elevation) with a gasoline mileage of 29.09. (U. S. A. gallons.)

Has full force-feed lubrication. Front end chain drive. Honed cylinders, lapped pistons pins. Aluminum alloy pistons. Bronze-backed piston pin and front end camshaft bearings. Fedders radiator. Ran 160 miles low gear non-stop in July, 1926. near San Antonio, Texas, without boiling.

The Star Four owes its power and economy supremacy to the high speed of its motor, good compression, correct operating temperature, full force-feed lubrication and excellent carburetion of today's motor fuel.

## News Notes

The sugar company will issue checks on Oct. 15th for beets delivered up to last Wednesday, by which time some farmers had delivered as high as 150 tons.

Last week manager T. G. Wood, of the sugar company sent out specimen beets to sugar, wholesalers, many of whom had never seen this Alberta product.

Last Tuesday Alvin Jones of Maple Leaf Bread fame, notified the Recorder that he had lost a little white pig. A few minutes later Constable VanOrman, well known to liquor offenders, notified the Recorder that he had found a little white pig. The editor made some Sherlock Holmes deductions. It was the same little white pig! Most remarkable, Watson!

J. E. Maudsley last Tuesday fell from his wagon and sprained his wrist. By the way, Mr. Maudsley is in the bee business and his honey is now on the local market.

Byron Wall suffered a nasty gash in the head on Monday at the factory while manipulating a Kelly press.

Mrs. O. S. Longman is enjoying a visit from her mother, Mrs. Barber, and her grandmother, Mrs. McLean. These three together with little Miss Longman make a reunion of four generations.

Born--To Mr. and Mrs. C. R. Wing last Saturday at a Lethbridge hospital, a daughter.

Mr. Gilbert, who will act as instructor in mathematics at the School of Agriculture. Until recently Mr. Gilbert was principal at the Nobleford high school.

The Dempsey-Tunney fight pictures will be shown at the Rex Theatre next Friday and Saturday. "Classified" with Corinne Griffith will also be shown. There will be two shows each night and a special matinee Saturday at 12 noon for patrons who are on night shift at the sugar factory.

"This is a house that Ellis built," are words which are becoming almost as well known as the old rhyme, "This is the house that Jack built."

## Town Council Notes

At the last meeting of the Town Council lots were sold to Mrs. W. Rodeback and to Mehew Bros.

Five new lights were ordered installed on the east side of Broadway between the second ward chapel and the Citizens Lumber company.

The threatened law suit by King and Green re the new cement sidewalk in front of the Security building was settled out of court by the Town agreeing to construct a new cement step and conceding exemption of frontage tax on the new walk.

With the need of a further water supply being felt it was decided to sink a new well on the southwest corner of Victoria Park.

Mr. Ford was given the position of scavenger. Rates for cleaning cesspools are \$2 per tank load. Dry garbage in receptacle 10c per move. Manure to nuisance lot \$1 per load. to owner's lot 50c per load. Outhouses 50c.

## Rules of Calf Club

At a meeting of the Lethbridge District Boys' and Girls' Calf Club last Saturday J. F. Anderson was elected a director to represent the Raymond district. Those who wish to join should make application before October 15th. Forms may be obtained from J. F. Anderson.

### RULES

Applications will be received until October 15th for entry in the Fourth Calf Feeding Competition which will commence November 1st.

Applicants must be over 12 and under 18 years of age on December 31st, 1926. The number of entries will be limited to about 25.

Prizes will be awarded on the same scale as the last contest. Preference will be given to applicants who can furnish their own calves, which must be of approved beef type, born after April 1st, 1926.

Applicants who cannot furnish their own calves will be assisted by the club as far as practicable, in securing suitable animals. Any such should say so in their applications, stating which breed they prefer.

No milk feeding will be allowed after November 1st.

Applications should be filed on before October 15th with the secretary, R. W. Gardiner, 207, Sherlock Block, Lethbridge.

## Letter From Tommy

Charlie Pittsworth hands the Recorder the following letter from Thos. Ott, our popular barber who moved to Bellingham a few weeks ago. The letter was typewritten.

Dear Charley:

Well, old top, here I am hoping to find you all well as it leaves us. This is the first time I have ever run one of these dam things so if I make any mistakes just overlook them--there goes one now. Well, the weather is lovely. Also fishing and hunting. Was out this morning and got my limit. Twenty is the bag, and they are in very good shape. No geese come here; only brant, and they stay out on the island.

Say boy, life is worth living down here. This is a whiteman's town. No Chinks, no Mennonites, no Russians. Everybody closes at 6 bells.

I have two places of business in sight but don't know which I am going to take yet. One is in a big department store, and the other is in full running order on Elk street.

I have been working in the biggest hotel shop in town since I came. It is very hard to get a steady job as so many barbers come here for the winter from all over.

Well I am getting tired punching this dam thing with one finger so tell all the boys, "Hello," and tell old Bill Paris I will try to write him next, and give him our regards and keep plenty for yourselves.

Well, be good till we meet again. Tom

1338 Grant St.

A 55-acre field of sugar beets now being dug by P. J. Christensen and sons is averaging better than 10 tons per acre. An acre patch on the town lot yielded 22 tons. I. B. Roberts harvested a 5-acre dry land field which averaged 12 tons.

## Immigration, Work and Prosperity

Notwithstanding that one of Canada's greatest needs is a larger population, the amazing fact is that whenever immigration shows a substantial increase, and it becomes apparent that the tide of settlement is setting in strongly Canada-wards, an outcry is raised in labor circles and influences are brought to bear to discourage immigration. No organized labor alone in voicing objections and offering opposition. Frequently church bodies, and sometimes national societies, adopt the same attitude.

Opposition to immigration sometimes finds expression in an attempt to induce the Government and other agencies interested in immigration to discontinue, or greatly curtail, their efforts to induce immigration to Canada. At other times it is revealed by a campaign of the most mischievous, misleading and, not infrequently, absolutely false statements regarding Canadian conditions, a most unpatriotic proceeding.

Most of this opposition is the result of ignorance or the acceptance of half-baked theories on the part of those who seek to prevent or restrict immigration. Some people object to anybody being allowed to enter Canada unless they speak the same language, dress in the same fashion, and worship at the same altar as they themselves do. These timid souls are fearful that they may be swamped, and they insist on Canada being regarded as a special preserve for themselves set aside in the world by an all-wise Providence with "No admittance" signs against people from other lands. They refuse to recognize the fact that all the great national groups of today, including the British, are the result of a fusion, an assimilation, of races.

Organized labor, on the other hand, opposes immigration because a majority of labor union members entertain the mistaken idea that by restricting a scarcity of labor, the opportunities for employment of those already in the country are enhanced, and that higher wages will likewise prevail. The economic and industrial history of the world proves otherwise.

A Melbourne, Australia, man writing in the London Daily Mail declares that progress and development in Australia are both being stifled and held back by the excessive cost of labor. One of the crying needs of Australia to bring about permanent prosperity is the carrying out of irrigation schemes on a large scale. The recent drought has once again emphasized the old lesson, and it is known that under the benign skies of Australia simple methods of irrigation like those practised by the peasants of Lombardy would produce astonishing results. But the problem of Australian irrigation is said to be like a hundred other problems there, it is easy to point out what might be done and what should be done, but much more difficult to get it done. The high cost of labor makes it impossible. As a result the farmer and his family struggles along as best they can with rude skill and appliances, but with low efficiency, postponed improvements, and backwardness of agricultural development.

The Labor Unionist looks on immigration as threatening his employment and as a menace to the established standard of wages. He refuses to see that a still greater menace lies in the retarded development of his country, but which development would bring increased employment and good wages. In all, he overlooks the fact that immigration, upon a scale which Australia will almost certainly never experience, had little or no effect upon the standard of employment and wages in the United States; rather did it maintain their standard by successful expansion. The one thing to keep up, or augment, wages in Australia, or in Canada for that matter, would be great area of development. Compared with what it might be the rate of present development is slow.

The most prosperous period in Canada in the experience of the present generation was during those years following the introduction of an aggressive immigration policy under Clifford Sifton, and when immigrants were pouring into the country. Following the depression of the after-the-war years Canada is once again experiencing better times and an increasing measure of industrial activity and prosperity, with employment plentiful and wages good, and at the same time immigration is heavier than at any time since the outbreak of the war, with an increase of 68 per cent over last year.

And because of this increase immigration, once again the cry is raised to put a stop to it. Canadians as a whole are asked by one section of the population, and for purely selfish and utterly mistaken reasons, to kill the goose that is laying the golden eggs for the Dominion of the present day, while at the same time being productive of a greater development and more prosperous future.

### Cobra Deaf to Sound

The cobra is deaf to all sounds, including the sound of a rifle bullet. It is a fact which receives only ground vibrations, such as when the cobra is kept in a box or basket in which the reptile is kept, partly stimulated by the creature by the force of the vibrations. It is thus rendered tractable so it can be handled.

Young Mrs. Green (at the bank to her's window): I wish to open an account here.  
Teller—Very well, madam. How much do you want to deposit?  
Mrs. Green—Why, nothing. I want to draw on forty dollars.

It might be possible for a man to write a sensible love letter, but he seldom does.

### Will Not Eliminate Fools

Perhaps the effort to invent a "fool proof" airplane will be successful. There is no reason to doubt that aviation will become safer as human ingenuity develops new devices. But "fool proof" is a large claim. Older means of transportation are not that. And the supply of fools is not likely to be exhausted.

### Coal In Sardinia

Vast coal and iron fields have been discovered at Perdudefogu, in the province of Cagliari, Sardinia. The coal, estimated to total 50,000,000 tons, is said to belong to the same class as English anthracite.

Eve may have been happy, and all that, but she had no neighbors to borrow things from.

## Peace River Coal

Millions of Tons Superior to Highest Grade American Coal

There are millions of tons of very high grade bituminous coal in the Peace River district of Alberta, of a quality superior to the highest grade of American coal, according to D. H. McDougall, former general manager of the Dominion Iron and Steel Company and vice-president of the Empire Steel Corporation, who is in Halifax after a visit to the Alberta coal deposits, about which he has prepared a report.

Mr. McDougall said he did not think the development of these coal fields would affect the coal industry in Eastern Canada, as Alberta coal would always find a ready market along the Pacific coast of the United States.

He described the Peace River district deposits as being the "greatest in Canada" and said they were available for mining at the lowest operating costs.

## Pain In The Muscles, Stiffness In Joints,

Quickly Subdued By Nerviline

Those who have tested out numerous balneants will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary city preparation, it has come to be known as King over all Pain. For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. A trial proves this. Get a 35 cent bottle from your dealer to-day.

## Clergymen Live Longest

Live Longer Than Any Other Class of Men in England

What is the healthiest job in England? Clergymen live longer than any other class of men, the government statisticians of Somerset House show. Gamekeepers on the great estates, printers, gardeners and makers of candles and glue, closely followed the preachers in the longevity records.

## WHEN YOUNG GIRLS GROW PALE AND THIN

Dr. Williams' Pink Pills Should be Taken to Enrich the Blood.

When girls grow weak, pale and thin, parents should not neglect these symptoms; to do so means disaster. The girl in her teens cannot develop into robust womanhood without an abundant supply of rich, red blood in her veins. It is the lack of this that is the great trouble with nine girls out of ten. Dr. Williams' Pink Pills have achieved world-wide fame for their remarkable blood-making properties. In these pills there is vigorous health, with glowing cheeks and sparkling eyes for every weak, pale girl. The value of the pills in cases of this kind is shown by the statement of Mrs. Winifred Rutty, Barton street, West, Hamilton, Ont., who says: "About two years ago my eldest girl got into very bad health. I took her to a doctor who advised having her tonsils removed, saying this was the root of the trouble. We had them removed, but it did not help her, and she seemed to have absorbed so much poison from the trouble that she did not pick up at all. She could neither eat nor sleep, and what food she did take did not digest. Then she developed a cough that kept her awake at night, and went down in weight to 35 pounds. A neighbor said to me, 'You have tried so many things why not try Dr. Williams' Pink Pills?' I got some and before she finished the second box she began to show improvement. She continued the use of the pills for some time and is now in the pink of condition, able to work and play, and eat and sleep with all her old-time vigor. These statements can be verified by neighbors who watched her restored from ill health to perfect health."

If your medicine dealer does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### University to Receive Grant

The University of Saskatchewan, which for the past two years has been conducting special courses for field men for lending institutions, is to receive a grant of \$4,000 from the Dominion Mortgage and Investments Association, in recognition of the value of this work, to financial institutions.

### Vancouver a Busy Port

According to statistics prepared by the Vancouver Merchants' Exchange, the foreign trade export of the port has increased 400 per cent in the past five years, while the import trade has increased 51 per cent.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

It is common knowledge to Arctic and Antarctic explorers that sea-ice more than a year old is entirely free from salt, although new ice contains the same amount of salt as sea water.

Minard's Liniment for chapped hands

## Cuticura Soap Is Refreshing After Outdoor Exercise

Warm baths with Cuticura Soap, after outdoor exercise, cleanse, cool and freshen the skin. Assisted by Cuticura Ointment they do much to allay irritation, redness and roughness of the face and hands and keep the skin soft and clear under all conditions of exposure.

Sample Pack Free by Mail. Address: Canadian Depot: "Bathhouse Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 50c. Cuticura Shaving Stick 25c.

## Grand Champion Bull

Canadian-Owned Jersey Bull Is Declared Grand Champion at Philadelphia Exhibition

A Canadian-owned animal, "Benedictine Oxford Lad," has been declared grand champion Jersey bull at the sesqui-centennial exhibition at Philadelphia. The animal was recently shipped from Brampton, Ont., and belongs to the herd of R. H. Bull and Sons. "Benedictine Oxford Lad" was declared grand champion bull at the Royal Winter Fair in Toronto last year.

In the competition for sheep, A. H. McLean and Sons, Kerwood, Ont., carried off the grand championships ram and ewes, also premier breeder and exhibition awards. — Associated Press Despatch.

## Would Help Revive Trade

English Manufacturers Hoping Prince Will Wear Straw Hat

Luton, the English town which is now making straw hats for the adornment of hundreds of thousands of heads next summer, wants to see the Prince of Wales wearing one.

It would be enough, thinks Luton, to revive a custom rapidly becoming extinct in England.

According to manufacturers Londoners buy fewer straw hats every year, probably because of the scarcity of hot weather and too much rain. Luton is still prosperous because of the large foreign trade, but it would, of course, be far more prosperous if Englishmen kept straw among their usually large collection of hats.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer, but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

### Carry Fish by Airplane

Dr. Chambers Mitchell, secretary to the Zoological Society of London, flew from Paris to London recently in a Handley Page Napier air liner of the Imperial Airways, bringing, in two tanks, 400 sea horses, caught the previous night in the Bay of Biscay, to replenish the tanks at the London Zoo aquarium.

## TEETHING BABIES

Thousands of Them DIE EVERY SUMMER

The hot weather is very hard on babies starting to cut their teeth. On the first sign of any looseness of the bowels the mother should give a few doses of

This will quickly offset the diarrhoea, vomiting and purging, and, perhaps, save the baby's life. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

The meaning of the three balls in front of the pawnbroker's shop is that it is three to one the proprietor wins.

## Germany's Newest Card

Aerial Power Is Their Aim Says French General

Germany will return to power in the air, Gen. Girard, president of the chamber of deputies army commission, warns in an interview published in Paris, urging France to be on guard against "tremendous preparations for air supremacy now going on in Germany."

"Demilitarization on the Rhine has removed the real menace," Gen. Girard said. "But progress and science have aided Germany to raise its head elsewhere and to seek to recover its fortunes in the clouds. Germany is free to construct commercial planes, by recent abrogation of the larger part of the restrictions imposed by the treaty of Versailles, and it is embarked on a great aviation dream. On its air fleet is built its hope of coming victory."

Continuing, the general said: "Germany's will to recover its place is revealed in the fact that it is covering all Europe and soon will cover all continents with airports, commercial lines, and transit stations, lavading all nations and the great highways of the world."

Germany's principal engineers, chemists, and aerodynamicists are working free of all control by the inter-allied commission in Copenhagen, Amsterdam, Italy, and Russia. Gen. Girard asserts, mentioning the names of Rohrbach, Fokker, Junker and Fieseler. "We will be stupefied suddenly to find the wings of the reich traverse the oceans, touch the poles, and embrace Europe and Asia, for by virtue of its camouflaged budget it allots as much for aeronautics as the whole war budget before 1914," the general asserts.

## Cold In Head Clogged Nostrils

Ringed Ears and Buzzing Head Noises Quickly and Pleasantly Relieved By Simple Wormwood Treatment

No more hawking, spitting or blowing, dry ticklings, dull headaches or buzzing head noises. Use Georo Wormwood Balm in your nostrils twice a day, and you may bid goodbye to catarrh and troublesome head colds. The pleasant, cooling and soothing fragrance of this old-time Woodword treatment promptly penetrates all through the air passages of the nose and throat—your clogged nostrils quickly open up—the "ringing" noises stop—you breathe through your nose freely as nature intended and your dull old head feels clear and clean! Put your faith in Georo Wormwood Balm and you won't need to stay stuffed up with a nasty cold or catarrh. At all good druggists—at little cost.

## No Hustlers Need Apply

Travellers in South America Must Take Things Easy

An interesting discovery has been made by firms in the United States that are trying to make business connections with Central and South America. They find that their most useful representatives are not 100 per cent efficient hustlers of the Babbitt type, but men from Louisiana and Mississippi, who take life more quietly and easily. "Go-getters," it is declared, "are not worth a darn," on the other side of the Rio Grande, while the so-called "lazy Southerner," with his restful afternoons and more ceremonious manners, has no difficulty in adapting himself to the ways of the Latin American and making the social contacts which in that part of the world are essential to profitable trade. —Manchester Guardian.

## Meet Success on Canadian Farms

Britishers Train in Old Country to Learn Conditions in Canada

So successful on Canadian farms have been young bachelors who, prior to residence in this country were students in agriculture at the Haddleigh Salvation Army Schools in Essex, England, that the Army will shortly receive into those institutions their first classes of married men destined for farm lands in the Dominion. The course will be given during six months, and will mean a thorough training in branches of agriculture, particularly adapted to conditions in Canada.

A Corrector of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

After a man has eaten everything set before him he wonders what ails him.

Somewhat when a man gets into a crowd he thinks that he is the only one in a hurry.

Feet sore?—Minard's Liniment

## From School Teacher To Great Eminence

A young man who was brought up on a farm in Western Pennsylvania studied diligently and qualified for district school teacher. Further pursuing his studies and teaching, he managed to save up enough money to put him thru medical college. After the Civil War, he began the practice of medicine in the new oil section of Pa., and often rode horse-back thru the woods to reach and relieve those who were seriously ill. He was a student of nature, knew and could easily recognize most of the medicinal plants growing in the woods. Later, he moved to Buffalo, N.Y., where he launched his favorite remedies, and, in a short time, they were sold by every druggist in the land. Today, the name of this man, Dr. R. V. Pierce, is known throughout the world. His Golden Medical Discovery is the best known blood medicine and tonic. More than fifty million bottles have been sold. If your druggist does not sell the "Discovery" in liquid or tablets, you can obtain a trial pkg. of the tablets by sending 10c to Dr. Pierce's Branch Laboratory in Bridgeburg, Ont.

## Wireless in the Arctic

Wireless Phone Spans a Distance of 1,200 Miles

Twelve hundred miles was the distance spanned in what is believed to have been the first long distance wireless phone conversation carried on from the Arctic Ocean. It was learned upon the arrival in Vancouver of the Hudson's Bay Company's fur trading steamer Baychino with a cargo of furs from the North valued at \$250,000.

Last July, when the Baychino was sailing in the Western Arctic, connection was established by her wireless operator, D. Mitchell, with another of the company's vessels, the Bay Rupert, near the northern entrance of Hudson's Bay, and successful conversations were held between officers of the two ships on two successive nights.

Many an indigent husband plows the indulgence to stop with himself.

## A BROKEN DOWN SYSTEM.

This is a condition (or dis-ease) to which doctors give many names, but which few of them really understand. It is simply weakness—broken down, as it were, of the vital forces that sustain the system. No matter what may be its causes (they are almost innumerable), its symptoms are much the same; the more prominent being depression, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what ails a broken-down system in all such cases is increased vitality—vigor, vital strength and energy to throw off these world-weary feelings, and as night succeeds day, this may be more certainly secured by a course of THE NEW FRENCH REMEDY, THERAPION No. 3.

It is taken in accordance with the directions accompanying it, with the utmost care.

## THE EXPIRING LAMP OF LIFE

LIGHTED UP AFRESH. and a new existence imparted in place of what had so lately seemed worn-out, used up, and valueless. This wonderful medicinal oil is suitable for all constitutions and conditions, in either sex; and it is difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this recuperative essence, which is fast and local in its action everywhere, and has preceded it for this wide-spread & numerous class of human ailments. Sold by the Chemists, or either No. 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751,

## Seed Treatment Of Wheat To Control Smut And Other Diseases Gives Larger Yield

That crop losses caused by parasitic organisms such as fungi and bacteria, amount to many millions of dollars annually is the statement made by the Natural Resources Intelligence Service of the Department of the Interior at Ottawa. The remedy is seed disinfection.

Dr. Clayton Roberts Ogden, Professor of Plant Pathology at Pennsylvania State College is engaged in research along this line and has been able to trace the spread of plant diseases through seed distribution in many cases. Through the sale and distribution of infected seed, parasites have been widely distributed throughout the production areas of the world. Some parasites, such as the cereal smuts, are known to be distributed wherever these crops are grown.

Seed treatment of wheat, oats, barley, etc., will control smuts and other diseases and result in a yield increase valued greatly in excess of the expense involved. For seed disinfection, formaldehyde, copper and corrosive sublimate have been generally considered standard, but each has its limitations. More recently organic mercurials have come to the attention of scientists studying the problem of seed disinfection. These appear to be superior to any material previously used, giving as wide a range of toxicity to parasites and a much wider margin of safety.

Seedmen are beginning to evince interest in seed treatment and it is predicted that in a few years only disinfected seed will be sold or seed produced under such conditions as to be relatively free from seed-borne parasites.

### Tankage for Nursing Sows

Provides a Useful Part of the Ration, As Shown by Tests

Tankage has been proved at the Brandon Experimental Farm to provide a useful part of the ration for sows raising litters. A test was made with three sows with litters of twenty-seven pigs, and three with litters of twenty-eight all approximately of the same age. The three sows fed one group was made up of oat chop two parts, barley chop one part, bean one part, and shorts one part, with three per cent oil cake meal added. The second group was fed a similar ration but included two per cent of tankage. Seven pounds of meal per sow per day were fed in each case. The extra cost of feeding the sows with tankage for twenty-five days was 63 cents. The sows receiving the tankage lost 294 pounds less than those in the other lot, while the litters of tankage-fed sows gained 1215 pounds more than those in the check lot. This test is reported in the Brandon Experimental Farm report for 1925, available at the Publications Branch of the Department of Agriculture, Ottawa.

### Okanagan Fruit Crop

Estimated That Apple Crop Will Be Heavier This Year

It is estimated by the Horticultural Department of the Provincial Government that the apple crop of the Okanagan district will reach a total of 3,217,000 boxes, as compared with the total crop last year of 2,552,419 boxes. The crab apple estimate is for 117,850 boxes, as compared with 115,623 boxes last year; peaches 100,200 boxes, compared with 163,841; plums and cherries, 215,250 boxes, as against 77,766 boxes last year.

### An Old Irish Tune

The tune "Yankee Doodle" is not American at all but Irish, says Dr. Gratton Flood, an Irish authority on musical history. He asserts that "Yankee Doodle" was originally an Irish air known as "All the Way to Galway." Also "God Save the King," the British national anthem, Dr. Flood says, is an old Irish tune which originated about 1525. —London Dispatch.

### European Wheat Crop Less

The wheat crop of Yugoslavia is officially estimated at 77,970,000 bushels as compared with 78,646,000 last year, according to a cable received by the Department of Agriculture at Ottawa. The total wheat production of nineteen European countries is 960,694,000 bushels against 1,023,823,000 last year, a decrease of 63,000,000 bushels.

A two weeks' vacation goes about as quickly as the days to pay the monthly rent come round.

When it comes to securing the earth a detective often can give a scrub-woman a few pointers.

W. N. F. 1918

### Kansas Farmers Come to Canada

More Than Eighty Families Settle in One District in Saskatchewan

More than 80 families from Kansas and adjacent mid-western states have been settled in the vicinity of Estevan and Tynor, Sask., since May of this year, and one of the largest American agricultural communities in western Canada is in process of formation, according to L. H. Boyd, superintendent of the land and colonization department of the Canadian National railways at St. Paul, Minn.

The settlement has been effected directly as a result of the efforts of the department and the land has been purchased from the railway. The experience this year has been that the new settlers have been so pleased with their land and prospects that they have been inducing relatives and friends in the United States to join them, and a big influx is expected next spring, Mr. Boyd stated.

These 80 families, according to Mr. Boyd, represent a cash investment in Saskatchewan of at least half a million dollars, every family being prepared to invest at least \$5,000 cash in land and equipment once they have satisfied themselves that the land can support them. In every case the head of the family is an experienced farmer who is prepared to settle in Canada rather than remain in Kansas and other states, where high rentals have to be paid for farms, and where the purchase of farm land is beyond the average purse owing to inflated values, Mr. Boyd said.

### See Machines As The Hope of Mankind

Edison Says They Are Only in Their Infancy

Thomas A. Edison thinks machines are the "hope of humanity," and that the future of the race depends on quantity production, and the invention of new and more complex machines to make it possible.

Expressing his views in an interview in the Forum, the electrical wizard says he has no distrust of machines, and thinks they will prove the "emancipator" of the human race.

He expresses his belief that America needs more machines and that a brain with nothing more than hands to carry out its ideas is "hopelessly hampered."

He sees a future when machines will relieve mankind of the drudgery of an enormous amount of work now being done by human hands.

### Who Was Mrs. Grundy?

Real Character Who Had Strong Sense of the Proprieties

One hears and sees somewhat frequently references to "Mrs. Grundy." Almost anyone has a rather good idea of the salient features of her character, but ask the question, "Who was Mrs. Grundy?" and a great variety of answers will be the result. The first answer will probably be that she was someone in the works of Dickens or Thackeray and various other guesses will be made, but Mrs. Grundy was a real character. She was, it appears, the housekeeper at Hampton Court, England, in the late '40s and early '50s of last century. A redoubtable lady, this Mrs. Grundy, with a strong sense of the proprieties, which led her to look up every work of art she considered unfit for public exhibition in a room which is still known in the palace as "Mrs. Grundy's Gallery."

### Bush Labor in Demand

Half a thousand men are required to take care of the immediate demand for bush workers, according to a press statement issued at Port Arthur, Ont. The present situation in the lumbering industry indicates that the Thunder Bay district will have the biggest year in its logging history. Timber operators from all parts of the district report their labor requirements will be at least one-third greater than last year, which was one of the best years since lumbering became the chief winter industry of Northern Ontario.

### Where Gossips Are Jailed

Gossiping wives are put in jail in the little Belgian town of Custrin. On the complaint of husbands housewives who leave their morning work to hang over the back fence with the neighbors can be committed by the authorities to the town bastille. Numerous complaints are made by husbands who invoke this revival of an old medieval law to keep their wives in hand.

A young man doesn't begin to rise in the world until he settles down.

### Unemployment in Britain

Over One Million Persons in Receipt of Poor Relief

On one day in July of this year 1,080,948 persons were in receipt of poor relief in 31 selected areas of Great Britain. While this is 1.7 per cent less than the previous month, it is 53.9 per cent greater than in July, 1925. According to figures just received by Bankers Trust Company of New York from its British Information Service, 604 out of every 10,000 of the estimated population were in receipt of aid in July of this year compared with 611 in June and only 394 in July of last year.

Of the above total of 1,080,948, 909,015 were persons living in England or Wales, and of this total 114,781 received indoor relief and the balance, 794,234, received outdoor relief. In Scotland the total receiving aid was 171,963, of which 9,481 received indoor relief and 162,482 outdoor relief.

### Electricity and Steam

Electrification of Railways Now Beyond the Experimental Stage

Electrification of railways is well beyond the experimental stage in London and in several of the large provincial cities, such as Liverpool. It gives greater speed, a more frequent service of trains, and a pleasant immunity from the smoke and dirt inseparable from steam locomotion. Technical authorities incline to the opinion that the big towns will be girdled by gradually widening circles, but that steam will, at least for many years, hold its own for long distance haulage. The progress already recorded is so satisfactory that we can afford to possess ourselves in patience and await future developments.

### Made Huge Omelet

When the American Theosophical Society held a banquet in connection with its recent convention at Chicago, the culinary force of a hotel was taxed to manufacture a huge omelet, containing 300 eggs and 800 pounds of mushrooms the single dish of the meal.

### Alberta Wheat Pool

Four hundred thousand additional acres in the province have been signed up during the present year, according to an announcement made by officials of the Alberta Wheat Pool. The Alberta Pool expects to handle sixty per cent of this year's crop.

### Succulent Annual Pastures

Palatable and Profitable Green Feed for Livestock

There are three succulent annual pastures particularly grown in this country. These are rape, kale and cabbage. The last named is not often referred to as regards its quality as a forage plant, but as stated in a recently issued pamphlet by the Forage Crop division of the Central Experimental Farm at Ottawa, the Savoy (wrinkled leaf) and Drumhead (smooth-leaf) types make a succulent, palatable and profitable addition to our annual pastures. Experiments in the cultivation of these crops have been conducted for several years at the Central and branch farms and stations throughout Canada. High moisture makes them difficult to cure, but also is responsible for their giving satisfactory results when pastured or fed green.

In the pamphlet, which is available at the Publications Branch of the Department of Agriculture, Ottawa, is given a table of results from tests at the Central Experimental Farm and also quotations from reports received from different branch farms and stations in all the provinces, showing the suitability of these fleshy annual crops for a wide range of soil and climatic conditions. In Prince Edward Island rape has proved good pasture in the fall for steers. In Nova Scotia it has proven the same for hogs. Brandon, Manitoba, results indicate that rape has an important place as a quick pasture for cattle, sheep and hogs. It recovers quickly from frost. Rape is generally known throughout the west, as affording good pasture for lambs, brood cows and growing pigs.

Kale is grown extensively in the Fraser Valley and on Vancouver Island and has proven one of the best available green foods for poultry and for milch cows.

### Marconi Lives on Yacht

Signor Marconi practically lives on his yacht. His crew consists almost entirely of Italians, but every man is specially trained and everything goes like clockwork. Marconi is always making wireless experiments and he cruises incessantly from port to port round the coast of Britain, seldom sleeping on shore two nights in succession.

Too many men try to adjust their religion to fit their business.

## Homestead Entries In West To Date Are Reported Greater Than For The Entire Year 1925

### B.C. Honey Yield

A Wide Variety of Flavors in Coast Province Product

British Columbia, apparently, is the only province where the honey yield is expected to approach normal, and even in this case the crop is described as spotty. However, as high as 25 cents per pound is being bid for the product from the Pacific Coast, and despatches indicate there will be no difficulty in disposing of any surplus over home requirements in the Prairie Provinces.

While there is a wide variety in flavor of honey in any section, because bees gather the nectar from many different sources, that made in British Columbia, on account of the great range in climate, seems to be distinct from any other in the Dominion. The honey coming from apiaries located in the mountains has a particularly pleasing flavor in most cases, but just what plant is responsible for this is not altogether known. Bees may in a few minutes reach a spot on the mountain side that is almost inaccessible to man. Prospectors have reported seeing bees working over a plant, locally known as false heather which grows on high, rocky ledges.

### Northern Alberta Crops

Oats Will Yield Sixty to Seventy Bushels to the Acre

Thirty bushel when crops will be common in the northern agricultural districts this year, according to estimates given by agents along the lines of the Edmonton, Dunvegan and British Columbia Railway. From every district—except one indication is that a bumper crop will be harvested in the Northland. In the majority of districts oats will yield sixty to seventy bushels per acre, with barley running in the neighborhood of forty bushels per acre.

Farmer (to chemist): Now be sure and mark plain on them bottles which is for my wife and which is for the cow. I don't want nothing to happen to that Jersey cow.

Homestead entries on Government land in Canada showed a large increase for the first seven months of the present year, says a Canadian Pacific bulletin. In this period a total of 3,830 homesteads were filed on in Western Canada, as compared with 2,686 in 1925, an increase of more than 8 per cent. Every province showed a substantial gain, the largest being in Manitoba, where the number was 682, as compared with 256 in 1925. Other figures were: Saskatchewan, 1,711, against 927; Alberta, 1,347, against 866; and British Columbia, 89, against 71.

The bulletin says that these filings accounted for the settlement of 612,800 acres of land, and that if only half of this acreage were seeded to wheat and produced the average yield of last year, it would have raised the production of western wheat by nearly 6,000,000 bushels. The bulletin continues:

"The homestead entries for the first seven months of 1926 are greater than for the entire year 1925, and approximately equal to the entire filings of the year 1921."

### New Feeder Purchase Policy

To Encourage Eastern Livestock Men to Purchase Feeders in the West

The new feeder purchase policy recently authorized by the Minister of Agriculture, will be in effect from September 1 to December 1. This is for the purpose of ensuring the success of the feeder shows to be held in Western Canada this fall, and to provide an opportunity to farmers in Eastern Canada to purchase a collection with Western ranchers for the securing of their annual supply of feeder cattle and feeder lambs. Under the terms of the policy, the Live Stock Branch will pay the reasonable travelling expenses of a farmer from Eastern Canada who purchases one or more carloads of stock at the Western sales to be brought back East for feeding purposes.

### Praise for Lord Willingdon

Glowing Tribute Paid to Canada's New Governor-General

The London Observer recently devoted a column to a glowing appreciation of Viscount Willingdon, Canada's new Governor-General. After paying tribute to Lady Willingdon and Lord Willingdon's work in India during the Great War in promoting British and Indian cooperation and goodwill the paper concludes:

"The Canadian people, as Lord Reading remarked the other day, will find in their new Governor-General a character. They cannot fail to be attracted, as the people of Bombay and Madras were attracted, by the frankness and sincerity of the King's representatives."

### Has Valuable Relic

Pennsylvania College Has Lens Used to Discover Oxygen

The celebration of the sesquicentennial of the discovery of oxygen by 1774 by Joseph Priestley, pioneer in chemical research, recalls the famous lens used by Priestley which is the possession of Dickinson College, Carlisle, Pa. The lens, together with some accompanying apparatus is of particular interest because it was with a clock lens that Priestley, by concentrating the sun's rays on mercuric oxide, discovered the gas oxygen. The college came into possession of the valuable relic through Thomas Cooper, who accompanied Priestley to America in 1794.

### Increased Earnings on Railways

Increased density of traffic, thrown into relief as the underlying cause of this year's increased earnings by Canadian railroads in the first half of the year. For the first six months gross revenue of all the roads showed an increase of \$26,975,106, or 13.6 per cent. The increase in net was even higher as the ratio between operating expenses and revenue was appreciably lower during this period.

### New Motor Oil

Chemists, seeking a substitute for castor oil, which has to be imported, have found a way to secure the oil from grape seeds. This is said to be of very high quality and suitable for airplane engines. Seven or eight gallons of oil are taken from the seed in a ton of grapes.

Teacher: How would you tell the height of the tower by means of a barometer?

Student: I'd lower the barometer from the top of the tower and then measure the rope.

## "Daddy" Blair of the Wild and Woolly West

1. One of the stampedes Dad attended. 2. Blair dressed as Cowboy taking part in Hudson Bay Parade, 1920, at the age of 89.

A world-weary Old Timer, one of the pioneers of the Canadian West, died recently in Edmonton at the age of 91. He was known as "Daddy" Blair, but his real name was Telesphore Alexander Blair. As a scout, soldier and adventurer he carried the Hudson's Bay Company flag into the remote corners of the West for half a century, finally bowing his sturdy shoulders before the ravages of age. Since the inauguration of stampedes in various cities in the West, Daddy was always one of the first to attend no matter how much he felt the weight of his years. He made his last effort in 1920 when he attended the Hudson's Bay Parade in Edmonton at the age of 89.

Dad was only fourteen years of age when he left the old homestead near Montreal. The glamour, the excitement, the rush and uncertainty of circus life, the shouts of the performers, the tumultuous applause of happy pleasure-seekers, lured him. Even the dust bit into his blood and away went Dad around the world with Barnum's Circus.

One day in London, Daddy was driving one of Barnum's eight horse teams. A little girl ran suddenly in

to the street. There was a shout, a shriek from one of the spectators, and before anyone knew what was happening Daddy had wrenched the ponies almost completely around, saving the child's life by about two inches. In the mix-up Daddy fell into the muddy street, ruining his clothes. Her Majesty Queen Victoria, who happened to witness the scene, called the next day, shook hands with Daddy and had a suit of clothes sent to him.

Blair started for the Northwest in 1852, walking from Ottawa to Fort Gary. When the Canadian Pacific Railway was building into Winnipeg he was put to work on a gang under Tom Scott, who was later the first victim of the Riel Rebellion. It was Scott who changed Blair's name to Blair.

For over thirty years the Man Who Wanted Adventure went up and down the country. He served as a scout for General Strange; he was attached to the service of Lord Strathcona, then Donald Smith of the C.P.R.; he carried mail for Hudson's Bay Company over the Crow's Nest Trail; and he narrowly escaped being burned to death by Indians. Daddy got the adventure he had thought he wanted

and he died more satisfied than many another man would have been.

For many years, in the sunset of his life, Daddy was a familiar figure on the streets of Edmonton with his silvery patriarchal mustache and soldierly bearing. But he ended up as a caretaker for buildings, and finally, when the old man could work no longer, he was taken care of by Miss Chatham of the Health Mission. Then Daddy's eyes began to grow dimmer. On sunny days he would ask pleasantly, "Why is it so dark. Doesn't the sun come out to play any more?" So it grew darker, the gaunt frame grew weaker and weaker, and the tired old feet which had carried their burden through a glorious, carefree life of adventure, turned towards the Happy Hunting Grounds where they will have to trudge over rough roads no more.

WORLD HAPPENINGS  
BRIEFLY TOLD

Permit is to be granted American aviators to fly over Brazilian territory during their forthcoming visit to South America.

A decree issued by the minister of agriculture, Chelli, prohibits the importation of potatoes from any country, because of wart disease.

The British navy is developing an "aerial dreadnought" which will be used in manœuvres with the fleet. Work on the new war machine is being conducted secretly.

The Canton Government contemplates lifting the anti-British boycott which has demoralized trade between Chinese and British concerns for more than a year.

A private firm is negotiating with the British admiralty for the purchase near Rosyth dockyard of a site on which to erect a glass factory where 1,000 men would be employed.

The French treasury announces the French government has paid 2,000,000 pounds (about \$10,000,000). Its first payment on the war debt. The Italian government also paid \$10,000,000 to the British government.

The South American Education Advisory board is considering the advisability of establishing classes for the study of Esperanto in the state schools. Esperanto is the proposed international language.

Viscount Willingdon, named to succeed Lord Byng as governor-general of Canada, has been made a Knight of the Order of Saint Michael and Saint George by order of His Majesty King George.

The engagement of Crown Prince Leopold, 24-year-old Belgian heir-apparent, to Princess Astrid of Sweden, 20, third daughter of the Duke of Västergötland, and niece of King Gustav, was officially announced.

"The outlook for improvement in the industrial field is much brighter than at any other period since 1921," declares the report of the executive committee of the Dominion Trades and Labor Congress, meeting at Montreal.

Steps will be taken by the National Association of Canadian Clubs to ask the Dominion Government to appoint a committee, representative of the Dominion, to organize the celebration of the diamond jubilee of Confederation.

Canadian investors are interested to the extent of many millions of dollars in Florida real estate, much of it in the neighborhood devastated by the storm, and it is feared that a heavy portion of the property loss will fall on residents of the Dominion.

Strange Method For  
Promoting Longevity

Biologist Says Decapitated Butterflies Live Longer Than Others

The strongest method ever devised for the promotion of longevity has just been presented to the British Academy of Sciences by Father Camille, a missionary in Madagascar, who, in addition to his missionary activities, has for many years pursued biological studies which have gained him a reputation as a scientist.

Indeed, his conclusion is that decapitated butterflies live longer than their fellows, who are left as Nature made them.

Some fifteen years ago M. Edmund Perrier reported to the Academy of Sciences his discovery that, if certain caterpillars were decapitated in such a way as to cause the minimum loss of blood, they would continue the natural course of their development, and, after passing through the chrysalis stage, emerge as perfectly healthy but headless butterflies. He found that those which he decapitated lived longer than the others.

Scientists who have studied the phenomenon have come to the conclusion that this is simply because they lead a much less active life. A perfect butterfly quickly spends his strength in activity, whereas his headless fellows, leading much more placid lives, wear out their vital forces at a slower rate, and thus attain a comparatively ripe old age.

## Canadian Flour for Brazil

With a view to developing an even greater market in Brazil for Canadian milled flour, an experimental full cargo left Montreal recently destined to Santos, the port for Sao Paulo, Brazil. This is the first full cargo of flour—amounting to 5,000 tons—taken to Brazil direct from a Canadian port. Heretofore much of the Canadian flour going to Brazil has been taken by rail to New York and there loaded on steamers sailing south.

A horse race at the Fair may be well enough, but trying to beat the iron horse to the crossing is hardly a "sport"—unless the coroner enjoys it.

W. N. U. 1648

Assisted Colonization  
By Chas. W. Peterson

In a vast country like Canada, containing within its boundaries so great a wealth of natural resources, there should be only two major problems in public policy, first, to provide for the gradual development of these resources by the introduction of new capital and by promoting a healthy increase in the working population, and, secondly, to so direct the quest for and distribution of such new population as to insure, as far as possible, that their energies shall be devoted to such occupations as will ensure a fairly balanced national production. Canada's present primary need is an increased rural producing and consuming population. With this need supplied, our industrial and transportation plants would be working overtime.

It is not difficult to comprehend that the days of easy accomplishment in the field of immigration are over. Our free, high quality lands are practically gone. The economic situation in Europe is such that people with capital are no longer available for settlement on our lands in any large numbers. The social revolution in the Old European civilizations for it has been nothing less, has made the lot of the "under dog" vastly better than it ever was in so far as elimination of the fear of the consequences of sickness and unemployment is concerned. Steamship fares have been trebled. Canada must wake up to the uncomfortable fact that to obtain results even anywhere near approaching those of former days—and such must be considered absolutely inadequate in view of our present urgent population requirements—it will be necessary to pursue policies vastly different to those of the past and present.

We must, more or less, forget the meaning of the term "immigration," and learn the significance of the word "colonization." Nothing short of a comprehensive plan involving the actual placing of people on the land, followed by an intelligent, friendly interest in their welfare for a couple of years after settlement will bear fruitful results. It will be absolutely essential to provide financial assistance to worthy, selected families to enable them to make the move. Canada must acquire the habit of thinking in terms of tens of millions of dollars if we are to get anywhere with an effective plan of agricultural development.

Intelligently handled no investment we can make will yield greater returns than providing a large capital to be utilized as direct loans to experienced farmers settling on our vacant spaces, at a very low rate of interest with a repayment period of from 20 to 30 years, this capital to constitute a revolving fund. Private interests have not hesitated to adopt this policy in the west in a volume running into millions. The only bona fide colonization in Canada today is, in fact, secured on this basis. The first prairie settlement of Western Canada was organized on that plan. The early Memnonite colonization in Manitoba was based on Federal financial assistance. \$100,000 was advanced to these people and faithfully repaid, with 6 per cent interest, in full, within six or seven years.

No class of people have a greater interest in the solution of our population problem than the country towns of Canada, where development has been comparatively slow for many years. Added population will give them an increased trading field and, in Eastern Canada at least, lead to the establishment of prosperous local industry, because the decided tendency now is for industrial concerns to locate in the smaller communities, where the cost of living is more moderate than in the large cities and where general conditions for labor are most favorable, entirely aside from the fact that the burden of taxation would be much lighter. With an increased producing and consuming population our smaller urban centre will again become what it has been in the past, and is in other countries, the backbone of the nation.

## A New Method of Freezing Fish

A successful experiment with a new process for the rapid freezing of fish was carried out recently here by members of the Atlantic Experimental Station for Fisheries. Fillets and fish were frozen in strong brine in 60 minutes, compared with 21 hours required by the usual process of air refrigeration. It is claimed that the freezing of fish in the shorter time will result in better flavour as well as more rapid transportation to market.

## A Two-ounce Frock

Women's frocks by envelope! Recently a London girl, wishing to send a frock to a friend, folded it neatly, placed it in a large office envelope and mailed it for the ordinary letter postage. The dress weighed two ounces.

Every circumstance you meet contains something for you.

## Famous Singer To Visit West

MADAME AMELITA GALLI-CURCI  
The greatest singer of the age, who will sing in the Stadium at Regina, Thursday, October 11th. This will be the only concert in Saskatchewan.

A Smart Frock of Plaid For School Or Play

Shirtings always form an effective trimming on frocks for the little miss from four to twelve years of age. This attractive model has a box collar and a yoke extending in a panel down the front. The long full sleeves are gathered into narrow wrist-bands, and are marked for a shorter length. No. 1377 is in sizes 4, 6, 8, 10 and 12 years. Size 8 requires 2½ yards 36-inch gingham, or 1½ yards 54-inch plaid flannel or jersey cloth. 20 cents.

## Made Fastest Flight

French Air Pilot Flew Nearly 300 Miles an Hour

Adjutant Bonnet, the French aeroplane pilot, has moved faster than any other man in the world. In a Bernard monoplane, with a Hispano Sulzer engine, he has flown at 278.4 miles an hour.

Speed records, for many reasons, are made close to the ground (writes Major Oliver Stewart.) A level course is marked out with huts containing observers and electrical timing apparatus at each end. The aeroplane, rushing along ten or fifteen feet above the grass, approaches the speed course from four or five miles away, and is going "full-out" about a mile from the first hut.

So close to the ground the impression of speed, even at 150 miles an hour, is emphatic. At the speed Adjutant Bonnet has attained the wind would be cutting around the windshield and playing on the sides of the pilot's helmet with the force of a fire hose. The full-throttle roar of a 600 h.p. engine at arm's length in front of him would be drowned by the howling caused by the machine drilling its way through the air.

If he raised a hand high above the edge of the cockpit, his arm would be broken by the air blast. If he put his head round the side of the windshield he would be suffocated.

## France Produces Own Dye Stuffs

Production of This Material Nearly Doubled During Past Five Years

The production of dye stuffs in France has been steadily increasing since 1920 and, according to advices received by the Bankers Trust Company of New York, from its French information service, the annual report of the Union des Producteurs et des Consommateurs pour le développement de l'industrie des matières colorantes en France) shows that imports of dye stuffs, which in 1922 totalled 1,397 tons and in 1921, 2,111 tons, aggregated 1,451 tons in 1925. Imports from Germany accounted for 388 tons only; whereas before the war French industry was largely dependent on that country for such products.

The output of French factories has nearly doubled during the last five years, the exact figures being 11,549 tons in 1925 as against 7,356 tons in 1920.

## Disastrous Extravagance

Extravagance, Whether National or Personal Can Only End in Disaster

The "decay of commercial probity," of which the report speaks is traced largely to the habit of people living beyond what they can afford. It is to be feared that this explanation is only too true. These reckless attempts to live more or less luxuriously without rendering any services in return are a noticeable feature of the age. Extravagance, whether in legal or personal can only end in disaster, but, though the country is infinitely poorer than before the war, many people are trying to maintain "the same or even a higher standard of living." London Daily Mail.

## Claims for Wheat Leakages

On last year's business the Claims Dept. of the Pool, in Winnipeg, which looks after claims for leakages in platform cars, as well as cars shipped through pool elevators, recovered approximately \$25,000, for its membership from the railways, as a result of successful claims.

A woman's missing sense of humor has saved many a man from making a fool of himself.

The fountain plays because the water works.

## PRAIRIE BOUND

This happy party of Scotch girls has just landed in Canada from the Anchor-Donaldson Line Ltd. They travelled under the auspices of the Catholic Women's League, and are proceeding to farms in Western Canada, chiefly Saskatchewan. This is indicative of the steady movement of British youth and womanhood to Canada.

## Receives New Appointment

MR. ALPHONSE BRAZEAU

In recognition of his excellent work among his compatriots in western Canada and as a compliment to the French speaking element west of the Great Lakes, Mr. Alphonse Brazeau has been appointed Travelling Passenger Agent of the Canadian National Railways, with headquarters in Winnipeg, and he will be detailed to the special duty of caring for the passenger traffic requirements of the French-Canadians of the west. For several years Mr. Brazeau has acted as a liaison officer between the company and the French Canadians and he was prominent in organizing the Franco-Canadian Tour from the west to St. Anne de Beaupre last December, the largest single party to travel from western Canada to Quebec, and one of the largest individual passenger movements in the history of the railroad. He also assisted to organize the western delegation to the Eucharistic Congress at Chicago last June and he personally conducted these pilgrimages. His popularity among his compatriots is attested to by the formal addresses of confidence and gratitude which have been presented to him by all of the parties whose traffic requirements he has undertaken to satisfy. Mr. Brazeau is of French parentage and he speaks French and English with equal facility. In choosing him for this important post the Canadian National Railways are adhering to a policy characteristic of Mr. Henry Thornton's regime, namely, to appoint French Canadians to posts having to do with the French speaking population.

In selecting Mr. Brazeau for this important work the company has chosen a man who, to an engaging personality and the qualities already mentioned, is able to add many years of varied experience in railroad work. Mr. Brazeau was born in Ottawa on October the 14th, 1883, the son of Paul Brazeau, for more than 20 years a railroad man himself. He was educated at Ottawa University and in 1901 he went to Toronto to commence his railroad career in the Baggage Department of the Toronto Terminal Company. He occupied various positions there until 1912, when he moved to join the staff of the Grand Trunk Pacific as Train Agent. In 1921 he was transferred to Winnipeg where he was Ticket Collector until 1923, when he became Terminal Passenger Agent, a position he has held since.

## Walking Cures The Blues

Charges Blood With Fresh Oxygen and Tones Up the Brain

If you are feeling a bit blue, inclined to melancholy, or pessimistic, a good brisk walk ought to clear it all away.

To a person who is normally cheery, a feeling of pessimism is a sure sign that all is not right with the system.

What has probably happened is this. There has not been enough exercise lately and the simple action of breathing has slowed down. When the breathing slows down the circulation of blood becomes languid, and with a lowered circulation the brain is affected.

Instead of the brain being kept clear and fresh, stale blood collects, and the action of the brain is slowed down. And the effect of this is very often pessimism.

A brisk walk sets the heart going strongly, and automatically the breathing becomes deeper. In this way, not only is the circulation speeded up, but the blood is charged with fresh oxygen, which tones up the brain.

## Classed With Artists

The plasterer is a great artist—a convention of them has been so informed by a delegation with the argument that the art goes back to the days of King Tutankhamen, and Michel Angelo was one of its greatest exponents.

More than half the people in the world live in Asia, on less than one-fourth of the earth's surface.

## SUNDAY SCHOOL LESSON

OCTOBER 3

## ISRAEL JOURNEYING TOWARD CANAAN

Golden Text: Come thou with us, and we will do thee good. Numbers 10:29.

Lesson: Numbers 10:11-36.

Devotional Reading: Psalm 34:1-8.

## Explanations and Comments

The Start From Sinai, verses 11-28. The children of Israel had left Egypt an undisciplined rabble. Now they are an orderly host. Each tribe has its appointed place on the march. Everything is ready for breaking camp. An indication of the Divine will is awaited.

And it came to pass in the second year, in the second month, on the twentieth day of the month, that the signal was given—the cloud which had been resting over the tabernacle "was taken up." What the nature of this cloud was, who shall say? Dr. G. Campbell Morgan voices the belief of many when he says it is best to consider it as a supernatural manifestation, indicating the presence and guidance of God. Recall the appearance of the guiding cloud at the crossing of the Red Sea.

"The soul must visit Sinai, but cannot live there; it must journey forth to Tabor, Calvary and Olivet. The Church of God is moving on. Find thy place in the procession. The risen Christ is leading the march; and the world will be his conquest. The cloud of God is over you, and his presence is your rear-guard (Isa. 52:12)" (Dr. F. B. Meyer).

## England's Small Railways

Country Can Boast of Two Smallest in World

England may not be able to boast the largest public railway in the world, but she has no hesitation in claiming to possess the smallest. Indeed, notices to that effect are posted on the line running from Ravensglass, the old Roman port in Cumberland, to Boot, under the shadow of Scfell. Its length is seven miles, its gauge is fifteen inches, and the engines are exact replicas in miniature of the express engines built for broad gauge lines. Each locomotive is about two feet and a half high and with its tender measures 12 feet 8 inches in length. As for the carriages, they resemble church pews, being open on all sides and without roofs. So in rainy weather it is a common sight for the train to arrive with its passengers holding up umbrellas. The carriages only hold two people a side, four to the compartment. The track was originally laid to accommodate the mines at Boot, the cost it is understood, including the equipment of five engines, twenty passenger coaches and forty goods trucks, totalling about twelve thousand pounds, around \$20,000. During the summer season the line carries about 20,000 sightseers.

England has another tiny railway in the shape of the Romney-Hythe line, with its five stations, its track of fifteen-inch gauge and its two engines, each one-third the size of an ordinary British engine. This road is not yet completed, but will have cost about \$200,000 when placed in operation.

## Thinks Canada Wonderful

New Zealander Is Impressed by First Visit to this Dominion

"Canada is a wonderful country and I have been delighted and interested since I crossed the border into the Dominion," said J. P. Hosking, of Auckland, New Zealand barrister and a governor of the university of Auckland.

Mr. Hosking has been travelling through the United States and Canada studying economic and municipal affairs and particularly matters concerning the proper development of population.

Regarding his travels through Canada, Mr. Hosking said: Montreal proved of great interest, but my stay in Quebec where the medieval and modern mingle is an experience never to be forgotten.

## Canada Is Painting Up

The consumption of paint and varnish is considered a very good indication of general prosperity throughout a country. Based on this principle, prosperity in Canada is decidedly on the up grade, according to a statement just issued by the Dominion Bureau of Statistics, which shows an increase of 9 per cent in production of paints, pigments and varnishes in Canada during the year 1925 as compared with the previous year. The production in 1925 was valued at \$22,231,248.

## Canada's Politest Man

The prize for the most considerate man in Canada goes to a Nova Scotian. In order not to disturb the speaker at a campaign meeting he took off his boots and tipped out of the hall when he had occasion to leave.—Vancouver Province.

The Belgian government has laid out a 250-square-mile tract in the Congo as a gorilla farm.

## New Parliament Will Be Called For First Week In December

Ottawa.—Developments of most interesting interest featured the week-end at Ottawa. The Conservative Government stepped out, the new Liberal ministry, after an absence of 88 days, returned, the Rt. Hon. Arthur Meighen announced that he will resign the leadership of the Conservative party and not seek a seat in the House, while Rt. Hon. Mackenzie King cleared up a number of points of obscurity in a series of announcements he made after taking office. The Prime Minister is going to the Imperial Conference and will likely sail on October 9, accompanied by Hon. Ernest Lapointe, Hon. J. A. Robb will be acting premier. The parliamentary session will be called for the first week in December and it will be a regular session, adjourning till January over the Christmas holidays. Hon. Vincent Massey is to be appointed Canadian Minister at Washington, but not immediately; the customs probe will go ahead with the personnel of the commission enlarged and with the scope widened. Hon. Rodolph Lemieux will again be Speaker of the House and Hon. Senator Heston of the Senate. Mr. Massey's appointment to Washington will be made only after a consultation with the British Government, for which the prospective minister will go to London with the Premier. The fairly voluminous pronouncements of the new Premier clear the air both as to his own plans and those of the Government regarding a variety of outstanding matters. Col. Balfour, who headed the soldiers' commission, is particularly desired for Minister of Defence. There are only two Liberal seats in Nova Scotia, Yarmouth, that hesitates to part with P. E. Hatfield, M.P., and Kings-Hants, which the Liberals won in a very close fight. It is expected, however, that the latter will be adjusted shortly.

## Sees Another Labor Government For Britain

MacDonald Party Will Win in the Next Election says Hon. F. O. Roberts. Montreal.—Predictions that in the next general British elections the Labor Party will replace MacDonald at the head were returned to office with a sufficient majority to shape and put into effect those policies which the working men so far had been unable to obtain through industrial organization, even through the great general strike, was made by the Rt. Hon. F. O. Roberts, who was Minister of Pensions in the MacDonald Government. The speech was at the convention of the Dominion Trades and Labor Congress. Mr. Roberts is fraternal delegate of the British General Trades Union Congress and he dealt with the coal strike and the general strike declaration of Premier Baldwin, the Bishop of London and Dean Inge being enervating parts of a speech which stirred the convention deeply. That the "reds" never would gain North America was a statement made by James B. Connors, president of the Swindon's Union, who is fraternal delegate of the American Federation of Labor.

**Want Economic Conference**  
Geneva.—The League of Nations Assembly has adopted a resolution calling for a world-wide economic conference. Germany was stated to be heartily in favor of the conference.

**Royal Wedding to December**  
Brussels, Belgium.—The wedding of Crown Prince Leopold to Princess Astrid has been provisionally fixed for some time in December.

## General Advance Of Fifteen Per Cent. Made In Ocean Freight Rates

Montreal.—Effective immediately, a general advance of 15 per cent has been made in the freight rates from Canadian ports to the United Kingdom by the steamship lines represented in the Canadian trans-Atlantic conference, announcement of this having been submitted by A. O. Minshall, conference secretary on behalf of the companies concerned.

Reasons given for this rise in rates is attributed to the increasing cost of coal and to the necessity for ships having to take coal aboard in this country for the reason that, thus re-

## Fortune Returning Through Coal Strike

Hugo Stinnes, Jr., Takes Long Term Contracts From Former British Markets

Berlin.—Hugo Stinnes, Jr., 29-year-old heir of Germany's war-time Croesus, today is regaining the financial throne which was his by right of inheritance and from which he was ousted last year after a brief period as head of the vast combination of trusts created by his father.

Thanks to the British coal strike, now in its fifth month, the younger Hugo's fortune is returning. Adroitly exploiting the small properties he retained after last year's crash, Hugo, Jr., has developed a coal export business from which, according to his associates, he has pocketed within 600 profit. France, Scandinavia? Not cent weeks from \$1,000,000 to \$3,000,000 and South America have purchased his offerings. It was estimated that his sales had increased from 2,000,000 to 2,500,000 tons as a result of the British strike, and he has obtained many long term coal contracts in former British markets thereby assuring continued profits.

## For The Public Health

Need Widespread Campaign to Educate the General Public

Saskatoon.—The necessity of a widespread campaign to educate the general public as to the means of combating diphtheria, small pox and typhoid fever, was strongly emphasized by Dr. H. H. Seymour, Department of Public Health, Regina, in addressing the Saskatchewan Medical Association in session at the University of Saskatchewan.

The speaker suggested a definite plan of action which provided for the cooperation of the medical men, the department of Education, the press, the clergy and every other organization that could further the work.

The association expressed its complete endorsement of the scheme.

Other speakers were Dr. E. E. Shepley, Saskatoon; Dr. J. S. Brown, Saskatoon; Dr. George C. Hale, London, Ont., and Dr. W. R. Coles, Regina.

## Western Press Association

Joint Session of Alberta, B.C. and Yukon Association Held at Coast

Victoria, B.C.—At the business session opening the joint conference of press association of Alberta, British Columbia and Yukon territory, the address of welcome, delivered by Mr. Marchant, acting mayor of Victoria, was responded to by Leonard H. Nesbitt, president of the Alberta Press Association. The women members of the party were entertained with an automobile tour of the city this afternoon by the Victoria Press Club and later were received at Government House by Lieutenant-Governor Bruce.

## Artists Destitute in Berlin

Berlin.—More than 2,000 destitute artists of all branches are included in the army of Berlin's unemployed. Of these artists who are unable to find work, 635 are actors, 339 painters, 223 opera singers, 162 sculptors and 89 writers.

## Take Refuge on U.S. Ships

Tien Tsin.—Renewed demonstrations of hostility against the British in Yangtze-Kiang River Valley caused many British nationals to take refuge aboard the United States warships patrolling the river.

## Would Regret King's Absence

London Paper says British Liberals Should Take Tip from Canada

London.—"It will be regrettable from every point of view if, as seems only too probable, Mr. Mackenzie King will be unable to attend the Imperial conference," says the Liberal weekly paper, Truth.

"The Liberal leaders in the Mother Land will have particular cause to regret Mr. King's absence from London," Truth adds, "for who is more fitted than he to give useful tips on the way to sweep the country?"

Continuing in a humorous vein, Truth proceeds to suggest that Mackenzie King should be invited to preside over a friendly and strictly private conference at which Lord Oxford and Asquith, Lloyd George, Walter Runciman, M.P., and a few other chieftains could consult with him freely on the best method of leading a party.

Calling this, the next best thing would be for all of them to go to Canada for a winter course of instruction.

## Probable That King Will Attend Parley

Urged By Supporters to Go to Imperial Conference

Toronto.—A special despatch from Ottawa to the Mail and Empire says:

"Rt. Hon. W. L. Mackenzie King will go to the Imperial Conference. He did not intend to go but many of his supporters demanded that he go and he will. Even strong English-speaking nationalists have urged on him how fatal it would be to his prestige west of the Ottawa river, if he remained in Canada when all the other members of the Empire were in London."

## Offered Big Job

Premier Brownlee of Alberta Tendered Position With Wheat Pool

Edmonton.—For the second time within a year the office of general manager, or chief executive officer of the Canada Co-operative Wheat Producers Ltd., made up of the three provincial wheat pools of Manitoba, Saskatchewan and Alberta, has been offered to Premier J. E. Brownlee, and the rumor is that Mr. Brownlee will resign his office as prime minister of Alberta to accept that position. Mr. Brownlee will neither confirm nor deny the rumor.

## Dempsey Meets His Match

Gene Tunney Defeat's Former Champion in Savage Fight

Philadelphia.—Gene Tunney won the heavyweight championship of the world in a pouring rain here, when he defeated Jack Dempsey in a savage fight that went the ten round limit.

Both judges were unanimous in declaring the blonde ex-marine the winner.

Tunney came within an ace of knocking Dempsey out in the first round, when he planted a hard right to the jaw, just before the bell rang.

## Millions For Florida Relief

Washington.—The Red Cross national headquarters set between \$1,600,000 and \$5,000,000 as the minimum required for immediate relief work in the Florida storm area. An appeal was issued to the people of the United States to provide the amount at once.

WORLD'S YOUNGEST MOUNTAIN CLIMBERS

These two children, Billy Agnew (left), age twelve, and Patsy Agnew (right), age ten, accomplished the astounding feat of climbing to the top of Mount Elbert, 14,333 feet.

## Have Not Definitely Rejected Conference

But Representatives of the Striking Miners Condemn Prime Minister's Proposal

London.—The entire executive committee of the British Miners' Federation met Premier Stanley Baldwin and the cabinet coal committee in Downing street and declared Mr. Baldwin's latest plan to end the coal strike was a complete change of front from the earlier promise to the miners made by Rt. Hon. Winston Churchill, Chancellor of the Exchequer. Although condemning the Prime Minister's proposal that the miners yield on the point of national bargaining with the mine owners, the strikers' representatives did not definitely reject the compromise, but left loopholes open to allow for further negotiations with the Government.

## Build Another Plane

Sikorsky Hopes to Have Plane Ready for Trans-Atlantic Flight in Spring

Westbury, N.Y.—Igor Sikorsky, designer and builder of the H-4, in which two of Capt. Paul Foeck's crew lost their lives in an attempted take-off for Paris, hopes to have another plane built by spring for a second attempt at a non-stop trans-Atlantic flight, he states.

It was learned that plans are already in preparation for the construction of a plane. Mr. Sikorsky indicated that in the next flight, he means to go along as mechanic to prove his confidence in his own work.

## Sobriety In Italy

Mussolini Encourages Restrictions on the Use of Alcohol

London.—"Encouraged by Mussolini, the school authorities of Italy have forbidden the children to take bottles of wine to school with their lunches," Ed. J. Richardson, European secretary of the World League Against Alcoholism, returning from a tour of Italy, announced.

"Mussolini is working strenuously for sobriety among the youth. Italy now has a tascisti law forbidding any winery to sell liquor to those under 18 years of age."

"Furthermore, there is a widespread movement to educate the more ignorant classes not to give any alcoholic drinks to children in the homes."

## Ship Is Scuttled

Sea Valves on Old Man-of-War Opened by Mischievous Boys

Sydney, N.S.—The old wooden man-of-war, Pelican, once one of the smartest vessels of the British North American squadron, was sunk at her moorings here election night by mischievous boys who opened her sea valves. She now lies in 25 feet of water, and an effort will be made to raise her next spring. Citizens of Sydney are planning to purchase the old vessel.

## Says Belgium Going Dry

Brussels, Belgium.—Belgium is going dry, Foreign Minister Vandervelde informed a delegation of cafe proprietors. The minister, who is responsible for the press in law prohibiting the sale of alcohol in cafes and restaurants, said he intended to introduce a bill prohibiting the sale of alcohol under any condition except for industrial purposes.

## Canadian National To Speed Up Immigration Programme During 1927

### Work On H. B. Railway

Expect 1,000 Men Will Be Employed Until End of Season

The Pas, Man.—Two hundred miles of trackage on the Hudson's Bay Railway has reached first 100 stage. It is now good for trains running 25 miles per hour and with final 100 in the spring it will be in first class condition and ready for anything.

This trackage is 175 miles out from The Pas and between Miles 221 and 254, gangs are working both ways to finish the work on the intervening gap. The pioneer gang is at Mile 317, 26 miles from Kettle River bridge, the present end of the steel, which point will be reached inside a month.

Cuts have all been widened and drained and gangs are at work renewing and repairing wooden bridges. Four carpenter crews are erecting water tanks. The telegraph line is now in shape and in operation as far as Mile 317.

Two steam shovels have been continuously working at Mile 127 and 254 respectively with six trains of logs of the output.

Three hundred and twenty thousand shovels have been distributed during the season, 265,000 of which have been placed in the road, all except 100,000 being re-used, thus ensuring as permanent a job as possible.

The number of men employed is increasing. A month ago it was 500, now there are 825 on the payroll and another big gang is expected tomorrow, making the total well over 1,000. The 1,000 mark may be reached before the season closes. The change which has taken place in the road during the last couple of months is almost incredible and in another month the engineers hope to have 300 miles completed.

As soon as freezeup compels the stopping of the work on the grade the men will be employed in clearing right of way, burning the replaced ties and in other work, which can be done at that time.

## Call Conservative Conference

Gathering to be Held at Ottawa on October 15th

Ottawa.—A meeting of Conservative members-elect of Parliament and defeated Conservative candidates have been called for at Ottawa on October 15th next. An official notice has been issued from Conservative headquarters in Ottawa to Conservative Senators, Conservative members-elect of the House of Commons and unsuccessful Conservative candidates in the recent elections of a gathering to be held in the Parliament Buildings on that date. The object of the meeting is "to consider the course to be pursued by the Conservative Party in the forthcoming session."

## Prize To Wheat Winner

C. P. R. Again Offering Prize of \$100 for Highest Points at Chicago Show

Winnipeg.—Following the practice of recent years the Canadian Pacific Railway Company is again awarding a prize of \$100 to the Canadian scoring the highest number of points in hard wheat at the International Hay and Grain show to be held in Chicago the last week in December.

In past years, with but one or two exceptions, the winner of this prize has also proved to be the winner of the world's championship in wheat.

## Plan Evacuation of Rhine

Geneva.—Germany and France are envisaging complete evacuation of the Rhineland and not a mere reduction of the forces of occupation, Dr. Stresemann, the German Foreign Secretary, told newspapermen prior to his departure for Berlin.

Montreal.—A three days conference attended by the European representatives of the Canadian National Colonization Department, held at headquarters in Montreal and presided over by Dr. W. J. Black, was held here.

Various phases of the transportation of settlers from England and from the continent to Canada, and details as to their care after settlement on the land in this country were discussed.

Commenting on the situation, W. R. Robb, vice-president of the Canadian National Colonization Department, said:

"We have been laying plans at a series of conferences of our colonization, agriculture and natural resources departments during the last three days, for developing and speeding up our whole immigration program during 1927."

"We have recognized clearly that the old days of dumping settlers in this country and leaving them to shift for themselves is long dead, and should be. Hence, our department sees that every man we are responsible for bringing out is definitely settled in a farm of his own."

"During the last season the demand for British settlers in both western and eastern Canada has been much greater than ever before. We propose to make every effort to answer this demand and are prepared to handle several times more British and Scandinavian settlers than we were able to settle this year."

"While our efforts during the past two years have been mainly devoted to recruiting farm workers in Europe and placing them in farm employment, we are hoping next to develop the settlement of families in a greater extent than formerly, in addition to cooperation in every way with the Dominion government furthering the 3,000 family scheme which has been so successful."

## Labor Men Denounce Senate

Should Be Reformed is Opinion of Delegates to Congress

Montreal.—Denunciation of the Canadian Senate as the body which ever stands in the way of the realization of Labor's legislative hopes was a feature of a session of the forty-second annual convention of the Dominion Trades and Labor Congress being held here. The incoming executive was instructed to do all in its power either toward abolition of the Senate or its reform.

Delegates pointed out it would be a difficult thing to abolish the Senate entirely, but all felt reforms must be brought about. Miss Mary McNab, Toronto, organizer of the textile workers, described the Senate as "a worn out tool, reminiscent of the days of ox-wagons in Canada, aged in mind and in body."

## Tighten Enforcement Laws

United States to Take Action to Enforce Immigration Restrictions

Washington, D.C.—In order to aid in tightening laws along the Canadian and southern borders, Harry E. Hall, U.S. commissioner of Immigration, has given orders that employees must not become entangled with liquor or gamblers. Any official who violates this rule will be cut off the payroll without ceremony. Mr. Hall says one of the chief troubles with enforcement along the Canadian and Mexican borders is that officials succumb to the temptations of bootleggers. He believes that the new policy is building up the morale of the force and that smuggling of immigrants across the border both north and south is becoming more and more difficult.

## Says Three Countries Should Control The World's Wheat Markets

Vancouver, B.C.—The Vancouver Province publishes the following cable from Sydney, Australia.

"Canada, Australia and the Argentine, the world's three principal wheat-producing countries, should control the world's wheat," declared Henry W. Wood, president of the Alberta Co-operative Wheat Pool, during the course of an address at a banquet rendered him by co-operative wheat interest here.

"The three countries," said Mr. Wood, "produced approximately 500,000,000 bushels of the world's exportable wheat surplus, which was about 700,000,000."

"If they set out to get control of the markets of the world, by a campaign of organized, systematic co-operation, there will be none that will say them nay," declared Mr. Wood.

## Slavery In Europe

Stated That Children are Bought and Sold by Hungary

How will believe that in A.D. 1926 slave markets exist in Europe? A visit to a slave market in Debreczen, the capital of the richest agricultural district in Hungary, where children are bought and sold like heads of cattle proves that such markets do exist.

Parents, whose gay national apparel barely hides their extreme poverty, bring in their children to the "Sziborog," the old clothes market of Debreczen. The children, aged six or seven, tell how what the day has in store for them. They are lined up in the market place for inspection by the "Czich," the wealthy farmers, proud arrogant descendants of the Hungarian nobility which kept the Turks at bay for hundreds of years.

The children are carefully examined, felt, thumped and appraised. Bargaining follows, and the father or the mother, who is the prospective buyer of the perfect soundness of their child.

A sum equivalent to \$5 or \$6, will buy such a child boy or girl. The price may rise to \$15, for the older ones, aged 12 to 15. When the bargain is settled the mother gives her offspring a last fearful hug and wrenches herself away. The child follows its master into its new life.

Children of six or seven will be put to tend the ducks, the older ones the sheep and goats. Time comes no pay, and the child, after a fashion, and when they have attained enough strength to do hard labor in the fields they become agricultural workers, receive a pittance, marry, and in turn have children whom they sell to their lord.

## Hulless Oats for Laying Stock

Found Useful for Putting Weight on Pullets

Hulless oats proved useful for putting weight on pullets when made a part of the ration. They failed however, to increase the yield of eggs. Twenty birds getting hulless oats gained twelve pounds against eight pounds and three quarters gained by an equal number getting oats of the ordinary kind. The egg yield was not improved, as only 938 eggs were laid by the twenty receiving hulless oats while 1,182 were laid by hens getting oats of the usual kind. The scratch feed given to one pen was made up of wheat, barley and hulless oats. With the other pen the hulless oats were replaced by common oats. The dry mash fed to the first pen consisted of hulless oats mixed with ten per cent. tankage and oil. The dry mash fed to the other pen was made up of equal parts of corn, oat chop, bran and shorts, with ten per cent. tankage added. The profit on the eggs from the hens receiving common oats was \$29.21 over the cost of feed, while in the case of those of the hulless oats the profit was \$19.10 less. This is not regarded as a final result, as announced by Mr. H. A. Thibault, the superintendent of the annual report of the Board of Agriculture for 1925, is being repeated this year.

## Successful British Settlers

Earl of Clarendon Investigates Conditions of Settlers From Overseas

In an interview quoted in the Press at Montreal, the Earl of Clarendon, who has been investigating the conditions of British settlers in Canada and has travelled across the Dominion to visit those who have come out from Great Britain under the British Selected Family Scheme, described the Scheme as "a conspicuous success."

Lord Clarendon showed great satisfaction at the fact of his visit. "Altogether we have visited 151 families," he said, "and we have not completed our tour." Most of the families he had seen had come out this spring and summer. The children were healthy and thriving. Several he had seen were defective on the other side, their parents said, but had improved in health and grown in strength in the western climate.

The men worked out the first year, while their wives looked after the farm, the three cows that were supplied them, the chickens and the pig. Lord Clarendon found this arrangement very sensible for, although the men sometimes only saw their families at week-ends, there was no expense for food for them and they were earning money at the same time.

## Will Enlarge Plant

New equipment and new construction, costing \$500,000, will be added to Imperial Oil Company's plant at Regina in the present year. A cracking plant to handle crude oil from Montana will be built. Machinery has been ordered and it is hoped to have the new facilities operating at the first of the new year.

W. N. C. 1943

## How to Detect Real Linen

One Test Which is Said to Be Infallible in this day of clever substitutes for real linen, even to the imposition of the fine gloss which is the characteristic of the linen damasks, there is one infallible test by which real linen may be detected from other fabrics.

In order to be certain of your cloth, remove a thread from the fabric, hold one end upright, wet it and tauten with the fingers. As it dries you may know it is linen if the thread revolves anti-clockwise. You may know it is not linen if the thread revolves clockwise. Another test may be made by putting a few drops of water on the cloth. If it soaks in quick, it is linen.

## Gets Permanent Free Pass

Short Term of French Minister Has Its Compensation

To be French minister, if only for thirty-six hours, as was the case of the late Herriot minister, apparently brings its consolations when those few hours are over for some ministers. Andre Pesse, former minister of public works, indicated this to Paris newspapermen who offered their sympathy as he passed through the lobby after the downfall of the Herriot regime.

"Well, I really don't know that I ought to accept your sympathy," the two-day minister replied. "I didn't entirely lose my time. Look at this." And he held out a permanent free pass, good on every French railroad.

## Population of Montreal

Continued growth in the population of Montreal, both in city and suburbs, is shown in the 1926-27 edition of Lovell's Montreal Directory. The estimate for Montreal proper is 552,873; suburbs, 124,959; Greater Montreal, 677,831. Last year's estimates by the same directory were: Montreal proper, 507,500; suburbs, 120,500; Greater Montreal, 628,000.

## Working in the Bunker

A man was going round a golf course, accompanied by his wife. He got into a bunker and after his forty-seventh shot his wife said, "If you go on like this, everyone'll think you're working here."

## Oriental Farmers In B. C.

Department of Agriculture to Ascertain How Many Are Employed in Agricultural Pursuits

Officials of the department of agriculture of British Columbia have almost completed a survey designed to show how many Orientals are engaged in farming pursuits in the province. It is expected that the figures compiled in the course of this enquiry will be available by the time the Legislature meets for presentation to the agricultural committee of that body, which requested this information.

The purpose of the survey is to show exactly how Oriental penetration is affecting the agricultural industry. Facts concerning Orientals' presence in industry are known through figures compiled by the labor department. So far, however, no definite information about their place in farming has been prepared.

The survey is securing figures from all parts of the province through municipal authorities and government offices.

## The Age of Discretion

Must Be Over 25 to Drive a Bus in London

When is a man grown up? Not until he is 26, says the London General Omnibus Company, which employs several thousand drivers and conductors in covering the London area with its network of speedy bus services.

The company believes that youths normally develop their sense of responsibility to full pitch between the ages of 24 and 26, and it will not accept as drivers men who have not reached the latter age.

"We do not say anything against the young man of 24" says one of the chiefs of the selection staff. "We choose men of that age to fill vacancies as conductors. But we will not take them as drivers until they are 26."

Striking when the iron is hot is all right, but too many men strike when the head is hot.

A cynic is a man who laughs at the world with tears in his eyes.

## The Family Budget

Young Women Should Receive Training in Household Management

"Given native intelligence a person without training can bring up a family with consummate skill," is a sentence in one of the reports given at the triennial conference of the Canadian Federation of Women.

Mrs. H. D. Young, convener of the education committee, in her report said that while every encouragement should be given to women fitted by nature for scholarship and research along traditional lines, courses should also be established to give opportunities of research along feminine lines. "Soon the housekeeper will soon such advice as 'How to keep house with a can-opener'."

As it is computed that women spend 20 per cent of the money of the nation, family budgeting is largely their affair. A woman's education should include training for her work as purchasing agent. A leak in the purchasing department is what sinks many a family.

## Saskatchewan Potatoes

Crop in Almost All Sections Reported to Be Good

A recently conducted survey into the potato industry of Saskatchewan, conducted by the Provincial Department of Agriculture, reveals the fact that while the acreage this year is somewhat lower than that reported in 1925, the crop in almost all sections is very good. This year, there are 44,600 acres in this province sown to potatoes, as compared with 45,000 in 1925.

## Increase Refining Capacity

A second still has been added to the plant of one of the oil refining companies at Coutis, Alta., which increases the capacity of the plant to 2,000 barrels of crude oil daily. A new well has been brought in 25 miles east of this place and close to the International Boundary with an estimated flow of from ten to twelve million cubic feet of wet gas daily.

It's an easy matter to take things as they come; it is the letting go of them that sometimes tries a man's fortitude.

## Big Increase in Immigration

Many Canadians Now Returning to Canada From U.S.

Immigration to Canada for the first seven months of 1926 was 68 per cent greater than for the same period a year ago, according to official figures made public by the Department of Immigration and Colonization. The total immigration for the first seven months of this year was 36,480 compared with 51,400 for the same period in 1925.

Immigration for the month of July showed an increase of 99 per cent over July a year ago, the figures being 16,227 and 8,159 respectively. Of the July immigration 5,293 were British, 2,197 from the United States and 8,737 from other countries. In addition to the above immigration, during July 6,187 Canadians were recorded as returning from the United States after having entered that country with the intention of remaining there permanently. These now declare their intention of permanently residing in Canada.

## New Land Being Broken

Estimated Fifty Thousand Acres to be Added to Carrot River Area

More new land is being broken in the Carrot River valley in Saskatchewan than in any year in the past decade. It is estimated that at least 50,000 acres will be added to the cropped area in the Valley next year as a result of this year's breaking. One implement firm sold 110 tractors since last spring, 70 per cent of which were paid for by spot cash.

## Alberta Yields Much Larger

A wheat yield of 120,000,000 bushels is estimated for the Province of Alberta this year by the Provincial Department of Agriculture, an increase of about eighteen millions over the previous year. The acreage sown to wheat was 6,275,000, an increase of 10 per cent. Bumper crops are reported in various parts of the country, notably from the Peace River district.

"Hello, Lella. What are you doing now?"  
"Sweeping, scrubbing, making beds."  
"Huh? Chambermaid?"  
"Married."

## Canadians And The Empire

Great Britain Will Never Forget the Debt She Owes to Canada

In the course of an address which he said would be about "nothing in particular," Lord Darling, English jurist, touring Canada, at a Canadian Club luncheon referred to the Enlon Jack, which was visible above the provincial court house from the window of the room in which he spoke as standing for the same justice in Canada as was enjoyed in England.

"What would be gained if you pulled down that flag?" he asked. "You are free, and you know it, to fly any flag, but you know there is no better flag. When we at home had to go to war through no choice of our own who were the first to come to our aid?—the Canadians."

"We shall never forget that. You know perfectly well that if it was necessary for you to call for the same help it would be forthcoming. Those who injure you injure us. You know that all the British Empire holds its yours to command if it is necessary. The British Empire is yours as much as it is any Englishman's. We are not as strong as we were but we are as strong as most of them."

## Might Be Possible In Theory

Trip to Moon Planned by Russian Scientists Hardly Practicable

Five years ago, Prof. R. H. Goddard, director of the physical laboratories at Clark University, Worcester, Mass., announced his intention of firing a rocket at the moon. Preliminary experiments and theoretical calculations, he said, had convinced him that it was possible to construct a self-propelling rocket capable of overcoming the earth's attraction, successive explosions of nitro-cellulose maintaining an average speed of two miles a second, which would take it to the moon in thirty-six hours.

His project was submitted to the American Association for the Advancement of Science, which body considered it quite feasible, and the Smithsonian Institution backed it with generous financial support. But so far the Goddard rocket has not been started on its 240,000-mile journey.

Now comes the news that a party of Russian scientists have stolen a march on both Prof. Goddard and Herr Oberth, and intend shortly to start for the moon in a rocket-like apparatus capable of carrying eleven persons. No details are given in the message, which comes from Moscow; but assuming that it is a serious and definite project to reach the moon, the Russian rocket is no doubt designed on the lines suggested by the American and German experimenters.

Theoretically, it might be possible to reach the moon by some such method, but the plight of any human beings who landed on it is not pleasant to contemplate. It is certain the moon has no atmosphere, or practically none. Should the Russians reach their goal they would have to carry out their exploration handicapped with heavy oxygen apparatus by which to breathe. During the lunar night, which lasts two weeks, the temperature would be worse than that of the polar regions, and in the daytime, equally long, the terrific heat of the sun, untempered by an atmosphere and never clouded, would be unbearable.

## Quakes Change Ocean Bed

Two-Mile Rise Near St. Helena In Twenty-five Years

Discovery that the bed of the Atlantic near the Island of St. Helena had risen two miles during the last twenty-five years has led to a belief among scientists that the entire Southern Atlantic bottom has undergone a vast submarine convulsion.

First news of this phenomenon was announced by a cable ship which had been repairing a break in the St. Helena-Cape Town line, laid twenty-seven years ago.

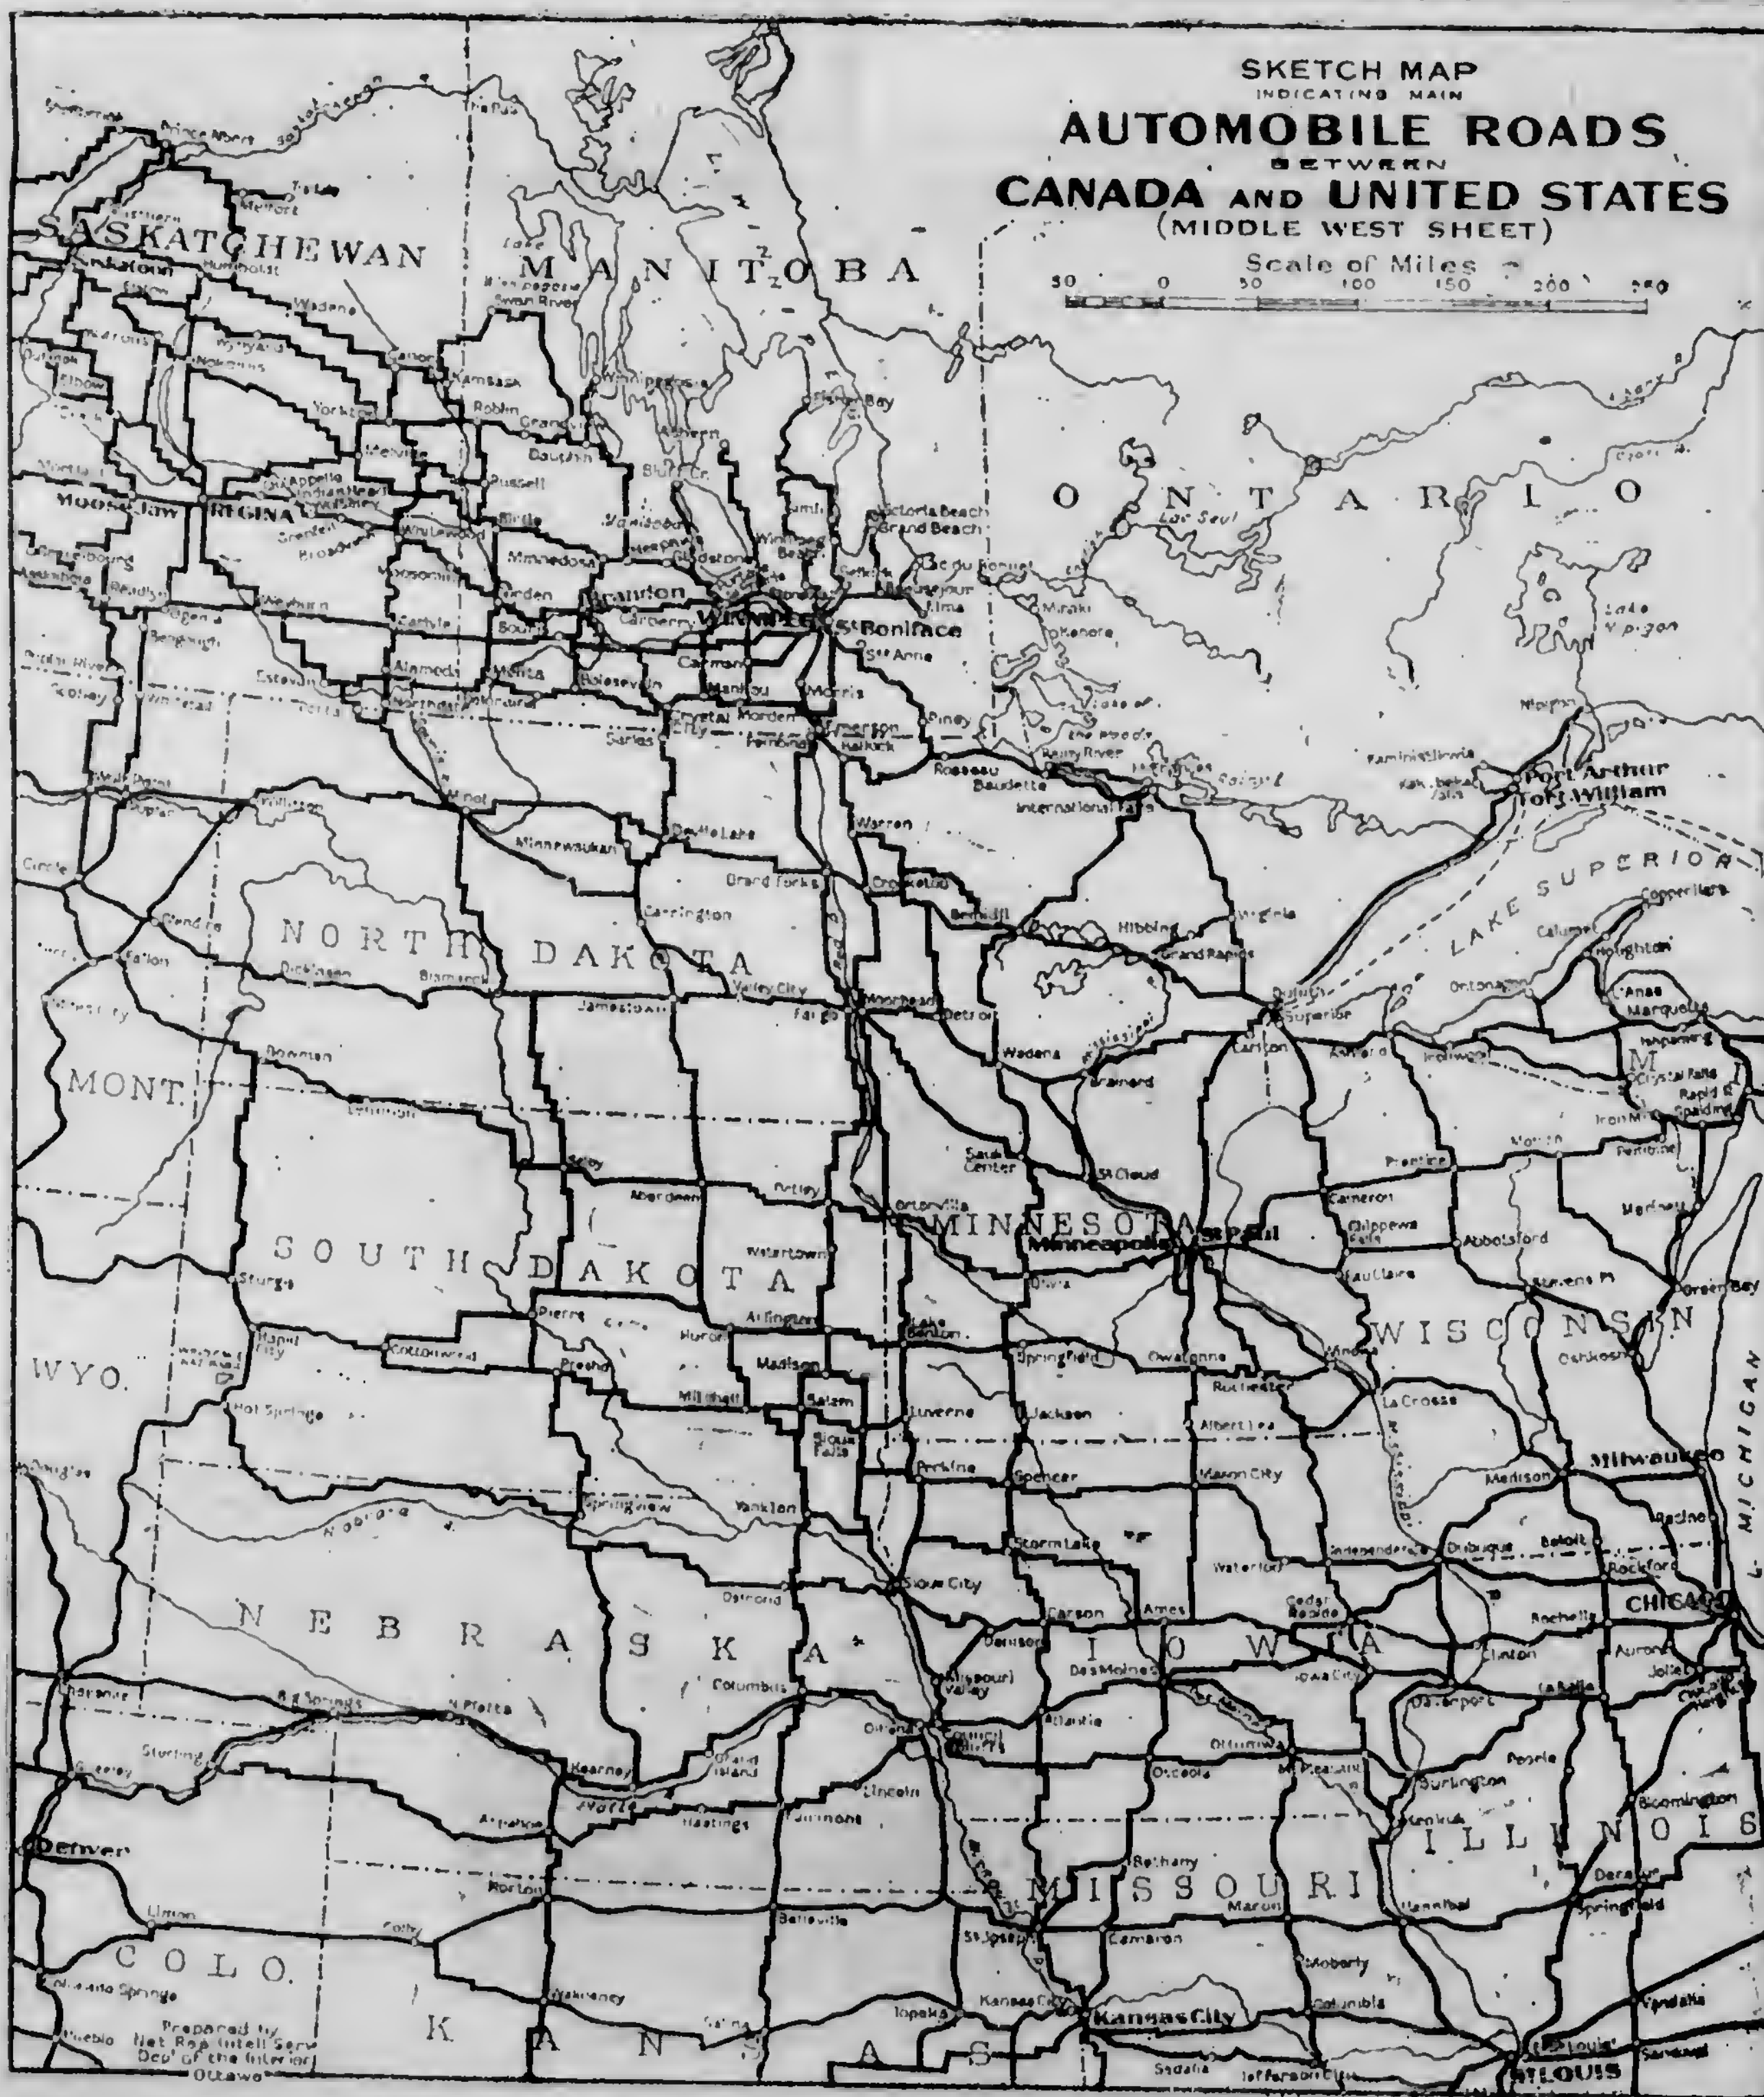

The cable ship found that instead of the sea being 2,700 fathoms, or just over three miles deep, as set forth on the chart, it was only 660 fathoms, about three-quarters of a mile.

Students of oceanography assert that such changes in the ocean bed are going on continuously and that the changes synchronize with earth quakes.

## Our Agricultural Wealth

Agriculture embraces one-third of the national wealth of Canada, according to S. Archibald, director of the Dominion Experimental Farms. "It is quite possible," he said, "that, with no more acreage than the present 12 millions under wheat cultivation in Canada, an increase of from ten bushels per acre in production, may be secured."

A woman can throw a hint straighter than a man can throw a rod.

The Middle West Sheet of the Sectional Road Map of Canada and the United States portrays general road information in the area represented above. The purpose of the map is to clearly indicate key information to tourists contemplating travel between the two countries by auto. Itoula

## It's The Lace Effect In A Tiffany Bread Wrap

That Makes It Suggest A Superior Quality Loaf

If you make good bread, a Tiffany Bread Wrap will become it admirably.

For the lace design in the wax appeals to a woman's fancy—and makes good bread look its best.

Besides, the lace design hides folds and creases in the paper—keeps the loaf fresh-looking.

Bakers are enthusiastic about this wrapper because it is selling loaves more bread for them. Customers instinctively prefer the quality loaf in the lace design Tiffany Wrapper.

Write for samples and prices today.

### CHAPTER XV.—Continued

When he was satisfied of his observations, which occupied hardly more than a brief hesitation, Lord Teddy moved closer on the cushioned divan—only the knee, which was crossed and pointed his way into him. His voice, when he spoke, was little above a murmur.

"Please," he pleaded, "don't let us pretend. It's much nicer not to. Really. You do it splendidly but you couldn't be wholly successful." When a woman has had so much experience, she knows there's nothing new under either the sun or the moon for her, then she has to pretend that she hasn't yet learned that everything is what it is and not what's in copy books. If she didn't she'd be too forbidding, so we know she's serious about it. But when a lovely girl makes believe she doesn't understand everything and everybody we know she's just mucking. Because she thinks she does, anyway. Don't you?"

Joanna regarded him elaborately, frankly imitating his own examination of her a moment before. "Yes," she said, her inimitable smile playing up on him. "Then you have a way with you—as a teacher. I suppose you've a diploma, or some good references, or things like that?" His ready laughter bubbled through his mask of seriousness.

"Only experience, my lovely Jo-

## CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Minesing, Ontario. "I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed, I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have told many a one about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it."—Mrs. NEAL BOWSER, R.R. 1, Minesing, Ontario.

Do you feel broken-down, nervous, and weak sometimes? Do you have times when you feel as if you were not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and it taken regularly and persistently will relieve this condition.

W. N. D. 1618

him puzzled her. She concluded he would be easily in his thirties, but, already she was becoming accustomed to older men than her "dancing boys" had been. John always had appeared older to her than any of the other chaps she knew, although he wasn't in years. She was astonished, secretly, at her own ability to be interesting to men who must have served many apprenticeships at more dazzling shrines than hers.

She was still disturbed by that ready supposition of his at their sudden meeting earlier in the afternoon. She reminded him of it again, and declared that she wouldn't be satisfied with him until he had made satisfactory explanation. He was not abashed.

"You were such a surprise," he assured her. "Not at all like the usual girl one sees about, in places, I'm fully fed up on you. I know you girls, most girls, I mean. They've lost their enthusiasm. You're enthusiastic. Sort of caught me unawares with it. And you haven't been spoiled. The girls one meets nowadays seem to be spoiled; they are, too many of them. The kind I know. They're the daughters of the crowd that have chow dogs, you know. Funny, but it has always struck me that when a woman gets a chow dog her daughter goes to the devil. Really doesn't go to the devil you know, but tries to act like she had been to him and found him too old-fashioned to be amusing. Now you're different. As soon as I saw you I was sure there were no chows in your family. Are there?"

"Not having any family, there aren't any," she said, quietly.

"Right! There's a reference for you. You see I'm always right about women. You're a flapper without a chow dog. There's a heap of difference. If I were a literary chap now, I'd put that in a book, or something. As it is you'll have to figure it out yourself. It's deeper than I usually go. I thought you must be something different, and I couldn't think of anything but fixing girls and dancing girls. As a rule they've got sense, anyway. The debutantes that imitate them haven't—by the same rule. Now am I forgiven?"

"I never forgive a man anything," she declared promptly. "It always makes him dangerous."

"That's your difference," he discovered eagerly. "The kind of girl I don't like, the kind that can't bear so daring as you are, is the one who's always trying to forgive. They say it adds to excitement."

Yvonne's voice interrupted. She dropped into a chair and surveyed the pair on the divan. "You two seem to be hitting it off quite satisfactorily," she commented. "No outwading confidences, I hope." Of Joanna, she asked: "He's relieved himself of his own admirations for his pin at Dore and Pen, I suppose?"

"We'd just started on them when we cut all preliminaries and got down to ourselves," Teddy informed her indignantly. "We've made progress. I shall be here tomorrow promptly at four to continue matters."

"You will not!" Yvonne protested him. "Miss Manners by the way have you made it Joanna yet? I see that you have. Well then, Joanna has a day mapped out. There's some important things to attend to. And you can't run along now. Teddy if you will, you may fix yourself a drink on your way out."

When he was gone Yvonne and Joanna took up the important matters of the morning; the automobile, its chauffeur—"I'll find you, one," Yvonne agreed—and a descent upon a famous jewelry house.

"There'll be a crowd here tomorrow night," Yvonne explained. "That's what Teddy was referring to. I'm making it a big crowd in your honor. I've elaborated for you. You'll meet everyone and they'll meet you. I'll have an unmarried senator and two married ones, without their wives; a few exiled Russian princes, and a smattering of their princesses. You'll like the Russian girls. Some South Americans who will make you think always of sapphires or black diamonds, and everybody who's in love with me or wants to be. That'll make a representative party. I'm keen to know how you'll like it—the crowd I mean. Between Brandon and Roddy, to say nothing of Teddy, you'll be well

## Take a REAL HOLIDAY this FALL!

Go to Europe! It's your slack season here in Canada, but in England, the social season, with all its life and amusements, is just getting into its stride. The lights of London are beckoning—the theatres and shops offer a diversity of interests and pleasures.

Plan now to make the crossing, on a Cunard or Anchor-Donaldson Canadian Service Cabin Class Steamer. You will find the trip itself a most enjoyable experience. Sailing from Montreal means a thousand miles of sheltered river travel before you come to the open sea which is crossed in a few delightful days.

Ask your steamship agent about the St. Lawrence route to Europe, or write—

## A HAPPY CHILDHOOD A MATTER OF HEALTH

Let Baby's Own Tablets Keep Your Children Well

Little children very quickly get out of sorts. By prompt treatment they can usually just as quickly be set right again. Most of their troubles arise in the first place from the stomach or bowels; that is why a good remedy out is the first thing prescribed by the doctor. Formerly castor oil was the means used to bring this about; now-a-days Baby's Own Tablets do the same work, but without trouble to the parent or discomfort to the little one. Children take Baby's Own Tablets happily because there is no nasty taste and because no gripping after-pains follow their use.

As a specific for childhood indigestion, vomiting, constipation, colic, colds, teething pains, etc., there is nothing to equal Baby's Own Tablets. They never do harm and always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Making it Hard**  
Salesman: But, my friend, with the carrier you could do twice as much work.

Why, ye dum fool, I don't want to do twice as much work. Life.

Keep Minard's Liniment in the house

A Family of Doctors  
Until the death of Dr. William Curtis, 87, of London, his family had produced an unbroken line of doctors for 225 years. Through five generations, fathers and sons practiced in the same picturesque seventeenth century house in Abingdon.

It has Many Qualities—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

## Little Helps For This Week

The Lord thy God shall bless thee in all thy works, and in all that thou puttest thine hand unto.—Deut. xvi, 19.

What is our duty here? To tend. From good is better, thence to best; Grateful to drink this cup; then bend.

I'm murmuring to our bed of rest; To pluck the flowers that round us blow.

Scattering our fragrance as we go.

—Sir J. Bowring.

To make some work of God's creation a little fruitful, better, more worthy of God, to make some human hearts a little wiser, happier, more blessed, less accused, it is a work for a god.—Thomas Carlyle.

## Western Canada Wheat

"The Wheat of Western Canada is unsurpassed anywhere in the world," writes the "Free Press" editorially, and adds: "In the marketing of Western wheat the outstanding development of recent years, of course, has been the creation of the Pools—the most ambitious undertaking which has resulted from the co-operative movement of the Western farmers."

"Sir, I have courted your daughter for six weeks."

"Well, what do you want?"

"To marry her, of course."

"Good, I thought you wanted a pension or something."—Ideas.

The gulleimot makes no nest, laying its eggs on the bare rock.

For all pains—Minard's Liniment

## Completes Flight Across Canada

Scaplane Travels from Montreal to Vancouver Without Mishap

Completing the first scaplane flight ever made across Canada, Squadron Leader A. Earl Godfrey, of the Royal Canadian Air Force headquarters staff, Ottawa, arrived at Vancouver recently. Within nine days of leaving Montreal, the transcontinental trip was completed after several delays because of bad weather. The 720 miles between Lake Wabimon, 40 miles west of Edmonton, and Vancouver, the distance which carried them over the Rocky Mountains, was covered in seven hours and 20 minutes, a non-stop flight.

"The course we took across Canada," Squadron Leader Godfrey said, "is an ideal scaplane route. Its possibilities for the future are good. With the exception of the Rocky Mountains, it would be possible in the future to fly by night over any portion of the route."

## Palestine Exploration

Reported Discovery of Ruins of First Jewish Settlement Near Jerusalem

Discovery of the ruins of the first Jewish settlement in Palestine, has been made by an archaeological expedition from Berlin university, headed by Prof. Ernest Sellin. He declares that the ruins, which are near Nablus, 30 miles north of Jerusalem, mark the site of Abraham's altar used in the sacrifice of Isaac, and also the burial place of Jacob.

## A HAPPY CHILDHOOD A MATTER OF HEALTH

Let Baby's Own Tablets Keep Your Children Well

Little children very quickly get out of sorts. By prompt treatment they can usually just as quickly be set right again. Most of their troubles arise in the first place from the stomach or bowels; that is why a good remedy out is the first thing prescribed by the doctor. Formerly castor oil was the means used to bring this about; now-a-days Baby's Own Tablets do the same work, but without trouble to the parent or discomfort to the little one. Children take Baby's Own Tablets happily because there is no nasty taste and because no gripping after-pains follow their use.

As a specific for childhood indigestion, vomiting, constipation, colic, colds, teething pains, etc., there is nothing to equal Baby's Own Tablets. They never do harm and always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Making it Hard**  
Salesman: But, my friend, with the carrier you could do twice as much work.

Why, ye dum fool, I don't want to do twice as much work. Life.

Keep Minard's Liniment in the house

A Family of Doctors  
Until the death of Dr. William Curtis, 87, of London, his family had produced an unbroken line of doctors for 225 years. Through five generations, fathers and sons practiced in the same picturesque seventeenth century house in Abingdon.

It has Many Qualities—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

## FOR Colds

**ASPIRIN**

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago  
Pain Neuralgia Toothache Rheumatism

**DOES NOT AFFECT THE HEART**

**Safe**

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocyclic acid ester of Salicylic acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

## Saves \$24 A Year

Cooking experts figure that the SMP Enamelled Ware Roaster will save the average Canadian family fully \$24.00 a year in meat bills. The secret is, it roasts the meat with very little shrinkage. Also, it makes cheap cuts taste like the best ones.

You place the roast in the roaster, put on the cover; the roaster does the rest. No basting required. Every roast is perfectly cooked.

The cover fits close, so that cooking odors cannot escape. Grease can't spatter out, which means a sweet clean oven. Prices range from \$5. to \$15.00 each, depending on size and finish and don't forget the saving of \$24.00 yearly.

## Russian Woman is Captain

Will Soon Command Soviet Trans-Atlantic Steamer

A woman soon is to command a Soviet trans-Atlantic steamer. She is Captain Marie Malagino, Russia's first woman sea captain. After graduating with honors from the government naval technical school, she served successfully as able seaman, second officer and pilot on Black Sea steamers. Her appointment as a first class captain on an ocean steamer awaits only the approval of the central executive committee of the government. She wears the regulation uniform and trousers, having discarded skirts as cumbersome.

Bathes and Part in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a few days restlessness, frequently or daily by convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are cooled up into a very healthy condition.

Most things are governed by the law of supply and demand, with the possible exception of making mistakes.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Patient (nervously)—"And will the operation be dangerous, Doctor?"  
Doctor—"Nonsense! You couldn't buy a dangerous operation for forty dollars."

## Here and There

Edmonton.—Large mouthed black  
bass may soon be available to Al-  
berta sportsmen for a batch of  
fingerlings and yearlings from the  
Kootenay Lakes have been placed in  
Lac La Poudre by the Northern  
Alberta Fish and Game Protective  
Association.

McGill University opened her  
senior football season in Montreal  
at the Percival Nelson Memorial  
Stadium on October 2nd, with a game  
against the Old Boys. One of the  
most enthusiastic fans of this game  
is E. W. Beatty, President of the  
Canadian Pacific Railway, who is  
an annual ticket holder, and who will  
be present at all the big games this  
season.

In a recent despatch from the  
west, W. L. Smith, former editor of  
the Farmer's Sun, estimates that  
approximately \$1,000,000,000 will be  
added to Canada's income this year  
from the products of the farms of  
Western Canada. Last year's field  
crops were valued at \$1,112,691,000  
to the growers and it put the west  
in the prosperity column. Mr. Smith  
believes it is a fair assumption that  
this year the return will not be less.

An interesting estimate of Can-  
ada's per capita wealth has been  
made by the League of Nations, with  
comparative figures of 22 years ago.  
In 1925 the per capita wealth in  
this country amounted to \$2,406, as  
contrasted with \$1,100 per capita in  
1903. Out of the 35 nations listed,  
Canada ranks third, the United  
States showing \$2,918 and Great  
Britain \$2,459 per capita, respec-  
tively.

With a view to obtaining financial  
assistance of some kind with which  
to aid the emigration of Austrian  
farmers to Canada, Dr. Heinrich  
Montel, an Austrian Government  
official, arrived in this country re-  
cently on board the Canadian Pacific  
S.S. "Montroyal." There are 10,000  
Austrian farmers who would emi-  
grate to Canada, stated Dr. Montel,  
all of them practical farmers, but  
they do not possess sufficient funds  
to pay their passage to this country.

Egypt may include Canada among  
those countries in which she will be  
without representation, according to  
a statement made recently by Emile  
Shartoni, acting as unofficial am-  
bassador to Canada who arrived in  
Canada on the Canadian Pacific  
liner "Minnesota." Mr. Shartoni is  
trying to interest Egypt in Canadian  
flour and timber, and in return ex-  
pects the Dominion to reciprocate  
by purchasing cotton, dried fruits,  
etc., direct from Egypt instead of  
through the middlemen in London  
or New York.

Walking about on a two-foot wide  
platform, 200, 300 and even 500 feet  
up the outer surface of huge chim-  
neys is all in a day's work to Henry  
Held, expert chimney builder and  
climber, who was employed recently  
by the Canadian Pacific Railway to  
overhaul a 200-foot chimney in the  
station yards at the Windsor Street  
Depot in Montreal. It took eight  
days for Held and his assistant,  
Richard Boucher, of Three Rivers,  
to move the platform, secured by a  
heavy cable, up the side of the chim-  
ney, in order to begin work at the  
top.

Lord Clarendon, Under-Secretary  
of State for Dominion Affairs in  
the British Government, sailed for  
England from Quebec on the Cana-  
dian Pacific liner "Empress of  
France," September 29th, bringing  
to a close an extended tour of the  
Dominion investigating the condi-  
tions under which the 8,000-family  
immigrant scheme is being carried  
out in Canada. His Lordship, who  
is chairman of the Overseas Settle-  
ment Board under whose auspices  
this scheme is being conducted, made  
the statement before his departure  
that he was greatly satisfied with  
the conditions amongst Britishers  
who have settled in Canada under  
this scheme. He personally visited  
180 families.

## Human Flies Scale C.P.R. Chimney

Walking around a two-foot-wide  
platform that encircled the top  
of the 218-foot high chimney at the  
end of the Windsor street station  
train platforms, Henry Held, of  
New York, and Richard Boucher, of  
Three Rivers, drew many eyes from  
neighboring streets and from the  
windows of the C.P.R. offices. The  
men had been engaged by the com-  
pany to repaint the bricks, clean  
the surface and repair the light-  
ning rods on the huge chimney.

The work of getting the platform  
to the top of the chimney occupied  
the men for eight days. Every up-  
ward movement of the platform was  
to a height of six feet and at the  
last minute of completing this work  
one of the men would be standing  
on a single plank, the rest having  
been raised to the upper position.  
This ticklish work was to the on-  
looker dangerous in the extreme,  
but the men thought nothing of it.  
Asked if he ever suffered from  
attacks of vertigo, Held laughed

and said he never had. "I feel just  
as safe up there as I do on the  
ground," he is a man over sixty  
years of age and has been doing  
this kind of work for the past four  
years. "I feel right at home on the  
C.P.R. chimney," he added, "for I  
built it in 1912." However, he is  
thinking of quitting in another com-  
ple of years, although his nerve is  
as good as ever it was. He owns a  
half-section of land in Alberta and  
it is there that he says he will  
settle down.

Both men moved with the same  
ease at the perilous height as  
though they were walking on the  
street. At times, when hauling a  
plank upwards, one of them stooped  
over the edge of the platform look-  
ing sheer down the drop of 200 feet.  
At other times they swung out from  
the walls of the chimney perched on  
a tiny cradle. At all times they  
appeared to have complete mastery  
of the situation.

Although it took them eight days  
to hoist the platform to its present  
position, they glided from it to the  
ground on a cradle in slightly less  
than a minute.
